1.4 BRIEF HISTORY & ADMINISTRATION;

Una District came into existence on 01-09-1972. This District till 1966 was a Tehsil of Hoshiarpur District of erst-while Punjab State. Consequent upon reorganization of Punjab State, hilly areas including part of Una Tehsil was transferred to Himachal Pradesh State on 01-01-1966 and Una Tehsil become a part of Kangra District of Himachal Pradesh. The Himachal Pradesh Government reorganized the then Kangra District into three districts namely Una, Hamirpur and Kangra. Besides this, Bangana Tehsil of Hamirpur District was included in this District. Administratively, Una District is divided into three Sub Divisions namely Una, Bangana and Amb with their headquarters at Una, Bangana and Amb respectively. Una subdivision has two tehsils, Amb Sub-division has one tehsil at Amb and one sub-tehsil at Bharwain and Bangana Sub Division has one tehsil. For the development administration, District has five development blocks namely Una, Amb, Bangana, Gagret and Haroli that are more or less coterminous with five assembly segments namely Una, Chintpurni, Kutlehar, Gagret and Haroli respectively. There are only one Municipal Council for Una Town and four Notified Area Committees for Gagret, Daulatpur, Mehatpur and Santokhgarh towns. For local Governance, district is divided into 235 Gram Panchayats. Local self Government in the District is organized on 3 tier pattern i.e Zila Parishad at District Level, Panchayat Samiti at Block Level and Gram Panchayat at Village level. There are five Block Samities at all the five development blocks. A list of all head of department in Una district and their contact details is annexed at Annexure- 1.

1.5 GEOGRAPHY AND BOUNDARIES:

The District headquarter is situated 232 Kilo Meters away from the State capital. The main source of income is agriculture and 80% population of the district is involved in agricultural activities. The total geographically area of Una District is 1540 Sq. Kilo Meters (report of Surveyor General of India). The District is situated at an altitude from 350 to 1200 Meters above MSL and it lies in the Shiwalik hills zone between 31° 21' 31" 50" latitude and 71° 55' 76" 28" longitudes. The District is situated in the East-North of the State and is surrounded by District(s) Bilaspur, Hamirpur and Kangra in the North and the west. However it is surrounded by the Districts of Rupnagar, Hoshiarpur of the state of Punjab on the south and the west.

1.6 RIVERS & KHUDES IN THE DISTRICT

Una District has one major seasonal river that sometimes is termed as “Sorrow of the District due to its vulnerability to flash floods. Besides, there are several minor and major seasonal rivers and khuds in the district and their number and location is indicated in table 1 as under:

Table 1

1.7 AREA

The total area of the District is 1,78,139 hectare out of which 42,454 hectares is cultivated area. Out of the total cultivated area only 6,546 hectares is irrigated. The uncultivated area comprising of 1, 11,741 hectares is wasteland and is mostly covered by the river swan and other small streams (Khad). 23,043 hectares of the land is under the forest. There are 868 revenue estates in District Una. The soil of District is sandy and loam in texture with scattered loamy patches.

1.8 CLIMATE: (TEMPERATURE, RAINFALL & GEOLOGY)

The climate of the District is mostly sub-tropical and has an annual normal rainfall of 1100 mm. Minimum temperature during the winter season goes down up to 3-4 degree celsius and the maximum temperature during the summer exceeds even 46-degree celsius. The climate remains generally dry throughout the year but during the rainy season it becomes humid.

1.9 ROADS & MEANS OF TRANSPORTATION:

Road Transportation is the life line for the economy of the district. The district is well connected by roads as well as rail. The district has good road connectivity and it is well connected with Chandigarh, Delhi and most of the areas of Punjab and Himachal Pradesh through all weather roads. The District Headquarter upto Amb is also connected by broad gauge railway line. The total length of metalled and unmetalled roads is 1,515 KMs including National and State Highways. All the Tehsils and Block Headquarters are well connected by roads and State Highway 32 passes through the District. The goods transport is almost in the hands of private truck operators dominate the transportation of Goods, while HRTC is the mail passenger transport service provider.

A fleet of 85 buses of HRTC is plying on different routes in the District. Besides HRTC, Punjab Roadways also operate on fewer routes. The District Headquarter is connected by broadgauge railway line upto Village Amb. The extension of railway line upto Daulatpur Chowk is in progress. The proposed railway line, once complete would terminate at Talwara.

1.10 DRINKING WATER SOURCES:

The district is comfortable in the supply of drinking water to its people and I & PH department water in every nook and corner of the District. However some areas of Development Block Bangana face acute shortage of drinking water during the summer months and drinking water supply is maintained through the water tankers. Tube wells, hand pumps, taps, wells, tanks, rivers, canals, lakes and natural springs are the main sources of drinking water in the District.

CHAPTER-2

HAZARDS AND VULNERABILITY OF UNA DISTRICT TO DISASTERS

2.1 RISK ANALYSIS AND VULNERABILITY ASSESSMENT:

Una district is highly vulnerable to certain natural and man made disasters. The major disasters to which Una district is prone to are; fire accidents, drought, hailstorms,land slides, flash floods, road accidents, chemical hazard, stampede ,earthquake, fire, Building collapses etc.

2.1.1 FIRE ACCIDENTS:

This kind of disasters that happen in Una District, normally in summer season, cause heavy losses to the residential houses / slums (Jhungi – Jhopri) Industries as well as Forest Produce. Slums/Jhungi Jhopris setup by the migrant labour are most vulnerable to the fire hazards. Human lives and live stock are affected in such fire accidents. The major history and database accident in Industries are as under:

Chemical/Industrial disaster/Accidents history of District Una:

Year/Date	Name of Industry	Cause	Magni-tude	Chemical/Product	Dead	Injured	Evacuated	Loss of Property
21.07.08	Luminious Power Tel.Pvt. Ltd. Gagret	FIRE	-	Led Acid Battries etc.	-	-	-	13 Crore Approx.
17.05.09	Kaushal Roller Floor Mills. Tahliwal	FIRE	-	Atta Mills	-	-	-	2,00,000=00 Approx.
24.06.09	MBD Pvt. Ltd.Gagret	FIRE	-	Paper mills	-	-	-	5 Crore App.
16.12.10	Preet Foot Wear Pvt. Ltd. Bathri	FIRE	-	Lather shoes etc.	-	-	-	250Lac App.
8.04.10	Ranger Breweries Ltd. Mehatpur	FIRE	-	WINE	-	-	-	40Lac.App.
14.09.10	Deepak Fastner Pvt. Ltd. Tahliwal	FIRE	-	IRON Nut Bold	-	-	-	3Lac. App.
30.04.11	Cozy Touch Pvt.Ltd. Laluwal	FIRE	-	Mattress	-	-	-	1,55, 00,000 /-App
23.11.11	Kanahya Indus.Ltd. Basal	FIRE	-	Mattress	-	-	-	2,50,00,000/-App,
1.06.12	Silver Tone Pvt.Ltd. Mehatpur	FIRE	-	Sinthatic mats	-	-	-	40Lac. App.
2.09.12	Stain Ford Lab.Pvt. Ltd. Mehatpur	FIRE	-	Medicines	-	-	-	1,50,000/-App.

2.1.2 DROUGHT:

Drought is the major problem of the district. The sources of drinking water as well as small nallahs and bowlies dry-up during summer season, especially in hilly area of the district, resulting into scarcity of drinking water. This problem is faced almost in the entire district but vulnerability of Bangana tehsil is more than rest of the District.

The droughts also affect the crops resulting into shortage of food and fodder. For crop loss, special survey is carried out to assess the crop loss and land Revenue is waived of by the Government, if the losses are above 50%. To meet with the requirement of fodder, wheat straw is imported from the Punjab State for its supply to the farmers at subsidized rates.

2.1.3. Hailstorms:

The hailstorm is not a regular disaster in Una District but it mostly occurs during the season of Rabi crops. Whenever such disaster occurs, the loss of crops is assessed through the field revenue agencies and losses are conveyed to the Government for further appropriate action.

2.1.4. Land Slides:

Una district is generally plain area having some hills. Land slides generally occur during the rainy season damaging houses, human lives, cattle and roads leading to road blocks. Hilly terrain having loose strata is more vulnerable to landslides than other parts of the district.

2.1.5. Floods

Most of the areas of this district are flood prone owing to the presence of seasonal rivers and khads. The main Swan River and its tributaries cause heavy losses to the human lives, livestock, land and property mainly due to flash floods. District Disaster Management agencies have identified and mapped villages and habitations prone to flash floods. Following villages/habitations in the district are vulnerable to flash floods:

1.Una Thesil		2.Haroli Tehsil		3.Amb Tehsil	
1	Jhalera	1	Saloh	1	Shivbari
2	Malahat	2	Palkhwah	2	Thathal
3	Ghaluwal	3	Badehra	3	Takarla
4	Santoshgarh			4	Nandpur
5	Khad			5	Seri
6	Pandoga			6	Saloh
7	Basal			7	Marwari
8	Raisary			8	Daulatpur Chowk
9	Dhamandri			9	Kuthera Jaswalan
10	Jalgran			10	Loharli
11	Nangran			11	Bhanjal
				12	Kalruhi Khad
				13	Amb
				14	Dhusara

2.1.6 ROAD ACCIDENTS

Una District like any other place in the state is vulnerable to road accidents but the vulnerability of the district Una increases manifold due to heavy as well as indisciplined traffic of pilgrims visiting religious shrines of the district such as Mata Chintpurni, Pir Nigah, Baba Bharbhag Singh at Mairi, Bharmauti temple, Jogi Panga, Baba Rudranand shrine. Not only this pilgrimes traffic in the district also increases as most of the tourists visiting shrines located at other districts such as Baba balak Nath, Jawala ji, Brijeshwari Devi, Chamunda ji etc. too pass through Una district. Although Hon'ble supreme court has forbidden transportation of human beings in goods carriers such as trucks and small goods carriers but it is still continuing unabated because there is no check on this menace in the states such as Punjab, Haryana and Rajasthan, from where this unruly and indisciplined traffic originates. Once this traffic enters the District on mass scale, it is impossible for district police to handle. Many such efforts have proved futile and caused law and order problems in the past.

2.1.7 EARTH QUAKE

Earthquakes are one of the most destructive of natural hazards. Earthquakes occur due to sudden transient motion of the ground as a result of release of elastic energy in a matter of few seconds. The impact of the event is most traumatic because it affects large area, occurs all of a sudden and is unpredictable. They can cause large scale loss of life and property and disrupt essential services such as water supply, sewerage systems, communication, power and transport. They not only destroy villages, towns and cities but the aftermath leads to destabilize the economic and social structure of the area affected.

Una District like other areas of Himachal Pradesh is highly vulnerable to this natural hazard as entire Himachal Pradesh exists in Zone V threat as depicted in map below. The vulnerability to damage in the district due to earthquake increases due to poorly equipped buildings especially in the rural areas. Government buildings in the rural areas, especially those constructed through Gram Panchayats such as schools, community centers, mahila mandal bhawans, youth club, anganbari centers are highly vulnerable to damage due to lack of inclusion of seismic features for construction of such buildings.

2.1.8 CHEMICAL HAZARD

Areas of the District bordering Nangal (Punjab) are highly vulnerable to chemical hazard due to the presence of two major chemical intensive establishments; NFL (National Fertilizers Limited) and (PACL) Punjab Alkali and Chemical Limited at Nangal. Seven Gram Panchayats of the district, namely; Ajouli, Mehatpur, Nagar Panchayat Mehatpur Basdehra, Poona/Binewal, Sanoli, Malookpur and Majara bordering Nangal are highly vulnerable to chemical hazard in case of accidental leakage of harmful/poisonous gasses from NFL/PACL. Besides these there is one major Indane LPG filling/bottling station at Raipur. Six gram Panchayats namely; Raipur, Charatgarh, Mehatpur, Basdehra, Chhatarpur Thada and Santoshgarh are highly vulnerable to fire and chemical hazard in case of any accident in this LPG installation. The database history of such incidents is as under:-

Chemical/Industrial Disaster/Accidents History of District Una

Year	Name of Industry	Cause	Magnitude	Chemical/Product	Dead	Injured	Evacuated	Loss of Property
2005	M/s Shree Balaji Magnese P.Ltd. VPO Gagret	Short circuit of electric	-	Ferro Alloys	No	-	-	268.43 lacs
2010	M/S Kanaiya Inds. VPO.Basal	-do-	-	P.U.Foam	No	-	-	200.00Lac
2012	M/s Himco Plastic Shed No. 41A, 1A, Mehatpur,	-do-	-	PVC Pipe & Pipe Fitting	No	-	-	8.00Lacs
2012	M/s Mehak Chemical Inds. Plot No. 47,48,49, 532 & 54, 1.A.Tahliwal,	Gas Leakage	-	Stable Bleaching Powder	No	-	-	Nil
2012	M/s Silver tones Impex P.Ltd. Plot No.15, 1.A.Mehatpur	Short circuit of Electric	-	PVC shittin g	No	-	-	10.00Lacs

CHAPTER 3

DISTRICT DISASTER MANAGEMENT PLAN & STRATEGY

3.1 STRUCTURE OF DISASTER MANAGEMENT PLAN IN DISTRICT UNA:

The Disaster Management Plan of the Una District has three components which are as under:

- (A) Risk Analysis and Vulnerability Assessment, (B) Response Plan and (C) Mitigation Strategy.
- (A) The Risk Analysis and Vulnerability Assessment depict the present picture for each disaster-exposure, loss of life, property damage, etc. It also shows geographic distribution of each hazard. The various monitoring facilities, regulatory regimes, countermeasures available for each disaster are identified and listed.
- (B) The response plan presents an organizational structure of the District to effectively handle the disaster in a coordinated and quickest possible manner to mitigate the impact of disaster. It identifies functional areas such as relief, restoration, communication, information, transport, emergency health services etc and proposes assignments to various departments; including identifying lead and supporting departments. The response plan also lays down preparedness checklists and Standing Operating Procedure (SOP) guidelines.

- (C) The mitigation strategy and plan focus on the long-term planning for impact reduction. It deals with the issues of continued commitment to hazard identification and risk assessment, applied research and technology transfer, investment-incentives for mitigation, and leadership and coordination for mitigation. The list of critical & life line buildings and facilities is annexed at Annexure -2, list of Shelters Elementary School/Block wise, Higher Education/Block wise are annexed at Annexure- 3 & 4.

3.2 COMMUNITY BASED DISASTER MANAGEMENT (CBDM)

During any disaster communities are not only the first to be affected but also the first responders. Community participation ensures local ownership addresses local needs and promotes Volunteerism and mutual help to prevent and minimize damage. As first responders to any disaster, communities will be trained in the various aspects of response such as first aid search and rescue, management of Community shelters, psycho-social counseling distribution of relief and accessing support from various Govt. department/agencies etc. Unlike man made disaster natural hazards like flash floods, earthquakes and cloudburst can not be avoided. However with mitigation measures along with proper planning of development works in the risk prone area, these hazards can be prevented from turning into disasters if we take preventive and mitigation measures in advance. This requires changes in the current development model practices and priorities.

Though the responsibility of disaster management is vested with the Centre and State Governments, it is extremely difficult for them to deal effectively on all the aspects of disaster management according to the needs of the affected people. In many cases where the disaster affected areas and population is large, the reach of the government machinery is not adequate and considerable loss to the life and property occurs due to lack of timely response. It has been experienced during recent major disasters across the country where local communities as well as the local governments took initiative, the process of rescue, relief and rehabilitation was smooth and effective, whereas in other areas, the Government and NGOs had to face enormous problems. The disaster management plan of the Una District therefore has been prepared through incorporation of the features of CBDM and involvement of local governments, Municipalities and PRIs and CBOs such as Mahila Mandals, Yuvak mandals, Anganbaris, SHGs etc.

3.3 MITIGATION & PREVENTION PLAN OF THE DISTRICT

Unlike man-made disasters, natural hazards like flash floods, earthquakes, and cloudbursts cannot be avoided. However, with mitigation measures along with proper planning of developmental work in the risk prone area, these hazards can be prevented from turning into disasters if we take preventive and mitigation measures in advance. This requires changes in the current development model, practices and priorities. Since disaster is a development problem, prevention and mitigation needs to be built in this process only. The primary objectives of mitigation efforts would be:

- (i) To identify and assess the existing and potential risks and to work towards reducing casualties and damage from disaster.
- (ii) To substantially increase public awareness of disaster risk to ensure safer environment for communities to live and work.
- (iii) To reduce the risk of loss of life, infrastructure, economic costs, and destruction that result from disasters.

In view of the prevailing risk and the vulnerabilities perception the mitigation measures purposed into seven major groups.

1. Risk assessment.
2. Construction work.
3. Research and Technology transfer.
4. Repair and maintenance.
5. Land use planning and regulations.
6. Training and capacity building.
7. Resources for mitigation.

1. Risk assessment:

As a first step towards disaster prevention and mitigation, hazard zonation, mapping, vulnerability and risk analysis in a multi hazard frame work will be carried up to local level, also the studies would be carried out using GIS and remote sensing data and other modern tools so that the study act as a Decision Support System (DSS) for disaster management . Stress will be laid to store and back-up essential baseline geospatial datasets so that they can be used immediately once a disaster occurs.

2. Construction work:

Resistant features have been incorporated in the building by-laws which will be revised from time to time in the district. Life line buildings represents critical infrastructure such as school and hospitals, public works department is responsible for conducting structure assessment retrofitting, and renovation of life-line buildings

3. Research and Technology transfer.

The departments of Public Works, Town and Country Planning shall be responsible for report on change in hazard, agency progress towards achieving mitigation goal ongoing projects and new opportunities arising through advancements in technology, knowledge or completed work

4. Repair and maintenance.

All departments in the district will ensure that mitigation measures are in- corporate into repairs, major alterations, new development and re-development practices in areas subject to substantial risk from hazards.

5. Land use planning and regulations

The department of Town & Country Planning and Municipal Council/ Local Bodies/Panchayats shall encourage new development to occur in locations avoiding in minimizing exposure to hazards or enhance design requirements to improve resiliency future disasters.

6. Training and capacity building.

The Community awareness and training activities will be carried out in form of training program through NGOs and Govt. Training Institutions. Special trainings will be given to local Contractors and Masons who are solely responsible for construction work.

7. Resources for mitigation:

It is purposed to create a District Disaster Mitigation fund to implement the strategy in order to provide incentives to developmental projects where mitigation measures have been adopted.

3.3.1 Preparation of Disaster Management Plan:

Communities are both victims and first responders to disasters. no response to District Management can be effective if it is not based on the strengths of local communities .Beside the district and local authorities will accord highest priority to build their own District Management capabilities and district authorities will try to provide necessary support.The role of local departments and other stakeholder as to be defined and clearly laid down in Disaster Management Plan at all levels. In consonance with the guidelines and provisions contained in DM Act, 2005 In order to ensure smooth response emergency support function (ESFs) would be identified and standard operating procedures, guidelines for performance of ESFs would be developed.

3.3.2 Medical Preparedness and Mass Casualty Management

Medical preparedness is a crucial component of any DM plan. There is a need to include safety of structural and non structural elements in hospital, evacuation plan, provision of alternative hospitals and identification of open space which could be used as open hospital to handle the rush of disaster victims. Also there is a need to focus on creating adequate mortuary facilities. Proper and speedy disposal of dead bodies and animals deserves some special efforts for carcasses.

3.3.3 Forecasting and Early Warning Systems:

Forecasting and early warning helps in mitigating the effects of disasters. The loss of life and property can be considerably reduced with accurate and time warning. The existing Meteorology department network in the district requires be establishing and strengthening with last mile connectivity. The nodal agencies responsible for monitoring and carrying out surveillance for specific natural disasters will identify technological gaps and formulate projects for better receipt of data forecast and timely dissemination.

3.3.4. Training Simulation and Mock Drills.

Disaster Management Plans are basically tested and refined through trainings, seminars and mock drills. The DDMA and local authorities in association with the NDMA will also conduct mock drills in different part of the district to test the efficacy of the Plans so prepare. District authorities will be encourage to generate a cultural of preparedness and quick response. Involvement of all the stakeholders and communities at large numbers may be ensured to make the exercise as a means of awareness, generation and community preparation.

3.3.5. Mobilising Stakeholders' Participation:

The DDMA will coordinate with civil defence, NCC, NYKS, NSS, Sports & Youth Clubs, Women based Organizations, NGOs, etc.. They will be trained in various aspects for Disaster Management more particularly in Search and Rescue and medical first aid. They will also be encouraged to empower the community and generate awareness through their respective institutional mechanism. Efforts to promote Voluntary involvement will be actively encourage.

3.3.6. Media Partnership:

The Media plays a critical role in information and knowledge dissemination in all phases of Disaster Management. The versatile potential of both electronic and print media needs to be fully utilised. Effective partnership with the media will be worked out in the field of community awareness, early warning and dissemination, and education regarding various disasters. The use of vernacular media would be harnessed for community education, awareness and preparedness at the local level. The Department of Information and Public Relations in consultation with the DMA and DDPA would take appropriate steps in this direction.

3.4 RESPONSE PLAN & STRATEGY FOR UNA DISTRICT

3.4.1. APPROACH:

Disaster Response is a multi agency function. Well coordinated, prompt and effective response minimises loss of life and property. On the contrary, delayed response will multiply the ill effects of disaster event. The response can be prompt and effective only when there is advance planning. Planning needs testing through mock drills in order to make it better. The roles and responsibilities need to be defined well in advance and chain of command is defined and well understood. The institutional mechanism need to be ensured and integrated synergised and proactive approach in dealing with any disaster.

3.4.2. ROLE OF DISTRICT AND LOCAL AUTHORITIES

The DDMA and local authorities will monitor and assess any developing situation and respond to the situation and also keep apprise to the higher authorities. Training and equipping of response forces, community preparedness, training and creation of response caches at district level as it will provide the cutting edge to all response activities. Local authorities, Panchayati Raj Institutions, Urban local bodies will play a significant role in response and rescue operations, relief and rehabilitation, awareness generation and disaster preparedness, restoration of livelihood options and co-ordination with NGOs and Civil Society.

3.4.3. STANDARD OPERATING PROCEDURES (SOPs):

The district, local authorities and other stakeholders will prepare SOPs in consonance with State, District and local plans applicable to them. SOPs will be prescribed for activities like search and rescue, medical assistance and casualty management, evacuation, restoration of essential services and communication at disaster sites etc. The other important activities are provision of food, drinking water, sanitation, clothing and management of relief camps.

3.4.4. LEVELs OF DISASTERS:

The SOPs for determining the levels of disasters and for issuing alerts to electronic messaging systems of various agencies about disasters have been formulated by District authorities. These SOPs will be reviewed periodically for disaster response management in case of natural and man-made disasters.

3.4.5. INCIDENT RESPONSE SYSTEM:

There is an urgent need for a proper and well prepared response system which would have a well thought out pre-designated roles for each member of the response team, systematic and complete planning process, system of accountability for the IRT members, clear cut chain of command, effective resource management, proper and coordinated communications set up system for effectively integrating independent agencies into the planning. It also incorporates the entire task that may be performed during DM irrespective of level of complexity. Various sections,

branches and units needs not to be activated at the same time but needs to be activated only as and when they are required, as everyone will know what needs to be done, who will do it and who is in command etc.

Responsible Officers (ROs) have been designated at district level as overall in-charge of the incident response management. The ROs may however delegate responsibilities to Incident Commanders (IC) who in turn will manage the incident through IRTs. The IRTs will be pre-designated at all levels i.e. District, Sub Divisions and Tehsils and Blocks. On receipt of early warning, the RO will activate them. In case a disaster occurs without any warning, the local IRT will respond and contact RO for further support, if required. A Nodal Officer has to be designated for proper co-ordination between District and Sub Division/field level.

The IRS System in the District would be grounded properly by imparting training to all the Govt. functionaries and other stakeholders so that the response is coordinated and effective and also devoid of chaos.

3.4.6. KEY RESPONDERS:

The role and importance of the community, village volunteers, village disaster management teams, village youth and women organisations, NGOs etc. under the leadership of local authorities, PRIs and ULBs being the bedrock of the process of disaster response, is well recognised. For their immediate support, there are other important first responders like the Police & Fire Medical Emergency Services. Other important responders will be the Civil Defence, Home Guards and youth organizations such as NCC, NSS & NYKS.

3.4.7. MEDICAL RESPONSE:

Medical Response has to be quick and effective. The execution of medical response plans and deployment of medical resources warrant special attention at district/ Sub Divisions and local level in most of the situations. The Voluntary deployment of nearest medical resources to the disaster site, irrespective of the administrative boundaries will be emphasized. Post disaster management of health, sanitation, and hygiene services is crucial to prevent an outbreak of epidemics. Therefore constant monitoring of any such possibility will be necessary. The 108 emergency services and Red Cross will complement and supplement the efforts of the health department in medical emergency response.

3.4.8. ANIMAL CARE:

Animal both domestic and wild are exposed to the effects of natural and man-made disasters. It is necessary to devise appropriate measures to protect animals and find means to shelters and feed them during disasters and their aftermath, through a community effort to the extent possible. Department of Animal Husbandry, fisheries, Social justice and empowerment and the PRI and ULBs concerned should devise measures at all levels to protect and treat injured animals, find shelters for them, make provisions to feed them.

3.4.9. INFORMATION AND MEDIA PARTNERSHIP:

Dissemination of accurate information through electronic and print media is very important during disasters in order to avoid panic and confusion. Regular press briefings by trained disaster management officials are essential. Training in information management and accurate reporting with sensitivity and respect for privacy and custom will be undertaken at all levels.

3.4.10. DISTRICT DISASTER MANAGEMENT AUTHORITY

- DDMA shall assess the situation and give directions to the concerned department heads in the district for better handling of the situation.
- DDMA shall assess the situation by taking into consideration reports from all formal and informal sources and decide upon the level of the disaster.
- Issue necessary direction for handling the response, relief & restoration measures.
- Call for outside support if necessary.
- Keep the SDMA/SEC (State Executive Committee) informed about the situation.
- Raise demands for support and assistance.
- Assess the resource availability and issue necessary direction for pooling resources for speeding an effective response.
- Process requests for NDRF/Army or any other specialised help.
- Coordinate with Power projects developers NGS's, civil society for supplementing the efforts of Govt.
- Monitoring and reviewing the situation on a regular basis.

3.4.11. Mainstreaming DRR in Development Planning- Approaches:

Disasters are basically unresolved problem of development. Development can increase vulnerability. Development can reduce vulnerability. The outcome rests on developmental choices. The seeds of disasters are often sown in development patterns: poor land use planning, environmental management and lack of regulatory mechanisms. It is due to this reason that despite having almost similar exposures disaster has greater impact on humans in developing or low developed countries than the developed countries. Therefore, disaster risk can best be addressed through integrating into the developmental planning, programmes and processes.

The mapping of hazards, identification of elements at risk and exposure data assists in quantifying risk. Thereafter risk reduction initiatives can be taken. Mainstreaming DRR is a prerequisite for safe and sustainable development. Some of the key sectors where integration of DRR can be done are as follows:

a) Public Infrastructure:

- (i) Incorporate disaster risk impact assessment as a part of the planning process before the construction starts.
- (ii) Site analysis and risk sensitive land-use planning (either avoid development in hazard prone areas or adopt treatment and mitigation measures).
- (iii) Strengthen compliance to the various provisions of the codes-set up hazard safety cell for advice and monitoring.
- (iv) Disaster resistant technologies mandatory in case of all construction using public/ corporate funds.
- (v) Training and capacity building of the department and functionaries.

b) Housing-Rural and Urban:

- (i) Application of hazard resistant designs
- (ii) Prepare construction guidelines for rural areas, Nagar Panchayats and Municipal Councils.
- (iii) Amendment of Building bye-laws, Zoning regulations and Development Control Regulations.
- (iv) Strengthening the enforcement of techno-legal and managerial regime.
- (v) Training of masons, engineers, architects, contractors, promoter and builders.
- (vi) Sensitization of the banking and financial institutions.
- (vii) Promotion of disaster insurance in housing sector.
- (viii) Having a housing reconstruction policy.

c) Health Sector:

- (i) Ensure hospitals and health facilities are not located in hazard-prone areas.
- (ii) Analyze the internal and external vulnerabilities of existing health care facilities during Emergencies.
- (iii) Retrofitting of the critical hospitals.
- (iv) Prepare and implement hospital preparedness plan.
- (v) Training of doctors on mass casualty management, trauma care and emergency medicine.
- (vi) Training of health workers on emergency preparedness and response.
- (vii) Strengthening of disease surveillance system.

d) MGNREGS- Scope of work-some illustrations:

- (i) Water conservation and water harvesting;
- (ii) Drought proofing, including forestation and tree plantation;
- (iii) Irrigation canals, including micro and minor irrigation works;
- (iv) Plantation and Horticulture;
- (v) Renovation of traditional water bodies, including de-silting of tanks;
- (vi) Land development;
- (vii) Flood control and protection works, including drainage in water logged areas; and
- (viii) Rural connectivity to provide all weather access.

e) Indira Awas Yojna:

- (i) Study IAY housing typology and develop hazard resistant model design (taking into consideration of available local materials and culture).
- (ii) Training of DRDA officials and engineers,
- (iii) Awareness generation among villagers and PRIs members and community mobilization campaign,
- (iv) Construction of sample IAY units for promoting the technology;
- (v) Training of Masons and community members on hazard resistant technology.

3.4.12. GO-NGO & IAG COORDINATION;

Development of a database of NGOs at all levels working in the field of disaster management and emergency response focusing on geographic outreach and thematic capacities of the organizations will be prepared. Capacity of identified NGOs in disaster management and emergency response will be build. Inter-Agency Group (IAG) will be formed in the State with an objective to:-

- i) Promote and institutionalize unified response strategy in humanitarian crisis;
- ii) Mainstreaming the emergency preparedness as in integrated development strategy;
- iii) Systematize the emergency response mechanism;
- iv) Bringing in the culture of "working together" in emergencies and normalcy; and
- v) Engagement in activities that will build the capacities of stakeholders and local communities to cope with Calamities.

3.4.13 FIRE ACCIDENTS

To deal with the fire incidents in the district Una, there is one fire service station at Rampur Tehsil & Distt.Una which has the manpower of 21 personnels, which includes one fire officer, 4 leading fireman, 6 Drivers, 9 Fireman and one Assistant. The fleet of fire brigade has 3 vehicles which include:

1	Fire Vosuer	= 1	No. 9000 Liters capacity.
2	Water Tender	= 1	No. 4500 Liters capacity.
3.	Small Water Tender	= 1	No. 2000 Liters capacity

In thickly populated area of the district i. e Una and Amb towns there are enough hydrants available with I&PH Department Division No.I and II. Fire extinguishers are being installed in all the offices of the districts and all heads of offices have been directed to take immediate action on it. Besides this, liasion is maintained with District Administration Ropar and Hoshiarpur for requisitioning fire tenders from Nangal and Hoshiarpur in case of exigency. A fire tender has been purchased for Temple Trust Chintpurni.

In case of fire incidents occurring in the district, Home Guards and jawans of 1st IRB Bangarh and Police are available for deployment. There are five companies of Home Guards having 478 Home Guards and one company of 1st IRB comprising of 100 trained men available. In any emergent situation these trained police men and Home Guards are readily available for deployment. At the community level, disaster management committees are formed and District is working on capacity building of the committee members to handle any sudden fire incident.

3.4.14 DROUGHT

To meet with this disaster, I&PH department has identifying the water scarcity areas and installing the hand pumps in the drought prone areas. Besides this, the traditional water sources are also cleaned and disinfected for making them usable. In some parts of the Bangana, Amb and Una Tehsils, where drinking water sources completely dry-up; the drinking water is supplied through tankers in the summer season. This position is reviewed with I&PH Department during summer season from time to time. Hand Pumps are being installed in drought prone area as a long term strategy. In order to contain adverse effects of drought on Agriculture and Horticulture, District is using MNREGA, DPAP and SWAN Watershed project to enhance irrigational potential by way of constructing water harvesting structure. Revenue and other departments are geared up to immediately take on the task of loss assessment to provide relief to farming community as per the provisions of relief manual and also to submit the case for special assistance from the State as well as the Central Government.

3.4.15 LAND SLIDES

To deal with this type of disaster, the machineries and equipments available in the district has been identified and inventory is prepared. Machinery available with all the three HP.PWD divisions, I&PH department as well as HRTC can be pressed into service without any loss of time. Liasion is also maintained with private construction companied operating in the district to identify equipment available with them and which could be requisitioned in case of emergent situations. In order to mitigate the occurance of landslides in the district retaining structures are being constructed through MNREGA, DPAP and SWAN watershed projects. Besides this, special care is taken by HPPWD department while undertaking the new road construction work.

3.4.16 FLOODS

To mitigate flood damages in the district, Government has set up a separate Flood Protection Division at Gagret which is channelising Swan River and its tributaries. Besides this villages are given early warnings well before the onset of rainy season as well as during the rainy season in order to prevent losses to life and property. Quick reaction teams of District Police, Ist IRB at Bangarh and Home Guards is kept at high alert in order to save the marooned people especially in the rainy season.

3.4.17 ROAD ACCIDENTS

In order to contain the incidence of Road accidents, district has planned strategy to maintain round the clock road discipline through District Police. Una District, round the year receives heavy indisciplined traffic in the shape of large number of heavy and light goods carriers carrying passengers. These goods carriers carrying overloaded passengers enter the district from the neighbouring states of Punjab and Haryana unchecked. Since it is impossible to handle lakhs of people within the district once they have entered in groups, the District administration has taken up this issue with the State government to take up the matter with Punjab and Haryana from where this unruly and indisciplined traffic originates.

3.4.18 EARTHQUAKE

Taking lessons from the past experiences of major earthquakes all over the country, where affected areas suffered mass scale devastation, district has elaborately planned a strategy to mitigate the effects of earthquake it strikes the district at all.

3.4.18.1 CAUSES OF THE EARTHQUAKE

An Earthquake is a series of underground shock waves and movements on the earth's surface caused by natural processes within the earth's crust.

3.4.18.2 GENERAL CHARACTERISTICS

i. Earthquake Vibrations

Earthquake vibrations occur in a variety of frequencies and velocities. The actual rupture process may last from a few seconds to as long as one minute for a major earthquake. Seismic waves generated by the rupture can last from several seconds to a few minutes. Ground shaking is caused by *body* waves and surface waves. **Body waves** (P and S waves) penetrate the body of the earth, vibrating fast. P waves travelling at about 6 km per second provide the initial jolt and cause buildings to vibrate in an up and down motion. Swaves, travelling about 4 km per second in a movement similar to a rope snapped like a whip because a typically sharper jolt that vibrates structures from side to side and causes even greater damage. S waves are usually the most destructive. **Surface waves** vibrate the ground horizontally and vertically. These long-period waves because swaying of tall buildings and slight wave motion in bodies of water even at great distances from the epicenter.

ii. Depth of Earthquakes

Earthquake focus depth is an important factor in shaping the characteristics of the waves and the damage they inflict. The focal depth can be deep (from 300 to 700 km), intermediate (60 to 300 km) or shallow (less than 60 km). **Deep focus earthquakes** are rarely destructive because the wave amplitude is greatly attenuated by the time it reaches the surface. **Shallow focus earthquakes** are more common and are extremely damaging because of their close proximity to the surface.

iii. Measurement Scales

Earthquakes can be described by use of two distinctly different scales of measurement demonstrating magnitude and intensity. Earthquake **magnitude** or amount of energy released is determined by use of a seismograph, an instrument that continuously records ground vibrations. A scale developed by a seismologist named Charles Richter mathematically adjusts the readings for the distance of the instrument from the epicenter.

The **Richter scale** is logarithmic. An increase of one magnitude signifies a 10-fold increase in ground

motion or roughly an increase of 30 times the energy. Thus, an earthquake with a magnitude of 7.5 releases 30 times more energy than one with a 6.5 magnitude, and approximately 900 times that of a 5.5 magnitude earthquake. A quake of magnitude 3 is the smallest normally felt by humans. The largest earthquakes that have been recorded under this system are 9.25 (Alaska, 1969) and 9.5 (Chile, 1960).

3.4.18.3 PREPAREDNESS IN UNA DISTRICT

i) Community preparedness – Community preparedness is vital for mitigating earthquake impact. District is in the process of undertaking effective programs that will be formal and initiated at the community level involving PRIs and CBOs such as MM, YM, village health and sanitation committees and village level disaster management committees with the support of State/National Government financial assistance.

ii) Public Education

Preparedness includes educating the public on the causes and characteristics of an earthquake and what they should do if one occurs. Public awareness program have been designed to reach every vulnerable person and thus significantly reduce the social and material costs of an earthquake. Some examples of information to be provided include:

- Causes of earthquakes and warning signs.
- Awareness of earthquake risks and ways to minimize personal vulnerability.
- Practical ways to reinforce vulnerable houses.
- What to do in the event of an earthquake (Box 1)
- What to do after the earthquake (Box 2)

iii) Post Disaster Assistance Needs

The immediate impact of an earthquake affects all sectors of the community. Therefore the DDMA would initially emphasize **search and rescue** of victims.

Secondly, **emergency medical assistance** will be provided especially during the first 72 hours. Third, a **damage and needs assessment survey** would be conducted to inform State Government of needs. Fourth, the survivors will be provided **relief assistance** such as food, water and emergency shelter. Attention would be given to reopening roads, re-establishing communications, contacting remote areas and conducting disaster assessments. At the end of the emergency period, long-term recovery needs would take priority. The post earthquake period presents an opportunity to minimize future risks through enactment or strengthening of land use and building codes as rebuilding takes place. The focus would be on repair and reconstruction of water, sewer, electrical services and roads technical, material and financial assistance for repair and reconstruction of houses and public buildings.

3.4.18.4 EARTHQUAKE RESPONSE PLAN

The emergency measures of evacuation, search, rescue and relief form important action plans in disaster management. Once disaster occurs, District Disaster Management Machinery would plunge into action in doing rescue and relief operations. The *Trigger Mechanism* is a vital part of preparedness plan whereby the receipt of a signal of an impending disaster would simultaneously energize and activate the mechanism of response and mitigation without loss of crucial time. Other aspects are Rapid Damage/Loss Assessment for Emergency relief, Documentation of damages and losses and reconstruction.

3.4.18.5 EARTHQUAKE MITIGATION PLAN

The golden rule is that there is no standard solution to mitigate a disaster risk. The goal of DDMA Una is to minimize the impact of disaster. Possible risk reduction measures being propagated in the District are:

Engineered structures (designed and built) to withstand ground shaking. Architectural and engineering inputs put together to improve building design and construction practice in the district. Propagate earthquake resistant construction techniques for private buildings.

Analyze soil type before construction and do not build structures on soft soil because buildings built on soft soils are more likely to get damaged even if the earthquake is not particularly strong in magnitude. Follow Indian Standard Code for construction of buildings Enforcement of building code in the byelaws. Land use control and restriction on density and heights of buildings, strengthening of important buildings, which need to be functional after a disaster. The list of inventory and capacity analysis is annexed as under.

“Upgrade Level of Safety of Building”

Box 1

What to Do During an Earthquake

- **Drop, Cover and hold on!** Move only a few steps to a nearby safe place. Most injured person in earthquakes move more than five feet during the shaking. It is very dangerous to try to leave a building during an earthquake because objects can fall on you. Many fatalities occur when people run outside of building, only to be killed by falling debris from collapsing walls.
- **If you are in bed, hold on and stay there, protecting your head with a pillow.** You are less likely to be injured staying where you are. Broken glass on the floor has caused injury to be those who have rolled to the floor or tried to get to doorways.
- **If you are outdoors, find a clear spot away from buildings, trees, streetlights, and power lines. Drop to the ground and stay there until the shaking stops.** Injuries can occur from falling trees, street-lights and power lines, or building debris.
- **If you are in a vehicle, put over to a clear location, stop and stay there with your seatbelt fastened until the shaking has stopped.** Trees, Power lines, poles, street signs, and other overhead items may fall during earthquakes. Stopping will help reduce your risk, and a hard-topped vehicle will help protect you from flying or falling objects. Once the shaking has stopped, Proceed with caution. Avoid bridges or ramps that might have been damaged by the quake.
- **Stay indoors until the shaking stops and you’re sure it’s safe to exit.** More injuries happen when people move during the shaking of an earthquake. After the shaking has stopped, if you go outside, move quickly away from the building to prevent injury from falling debris.
- **Stay away from windows.** Windows can shatter with such force that you can be injured several feet away.
- **In a high-rise building, expect the fire alarms and sprinklers to go off during a quake.** Earthquakes frequently cause fire alarm and fire sprinkler systems to go off even if there is no fire. Check for and extinguish small fires, and if exiting use the stairs.
- **If you are in a mountainous area or near unstable slopes or cliffs,** be alert for falling rocks and other debris that could be loosened by the earthquake. Landslides commonly happen after earthquakes.

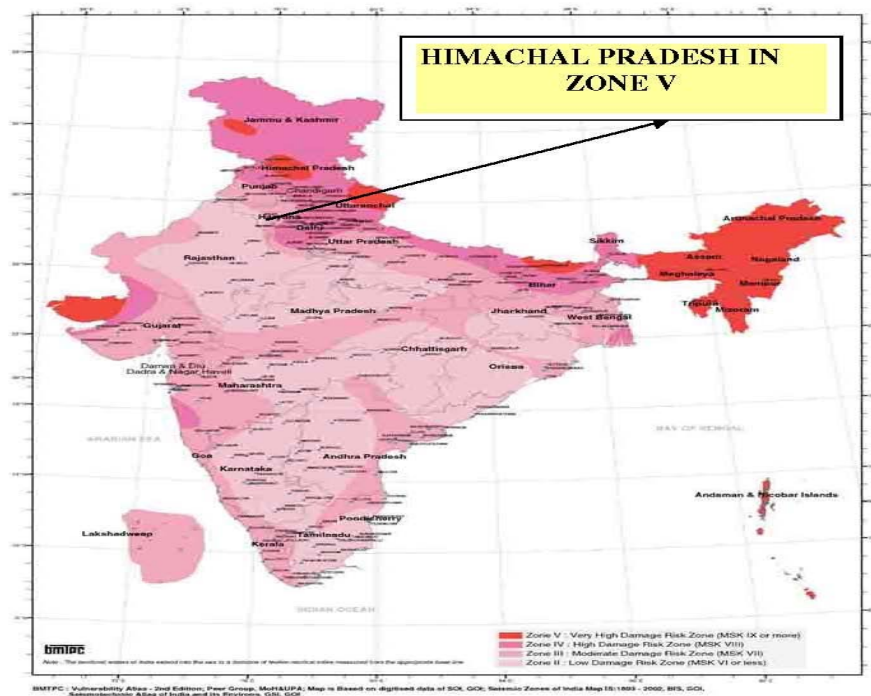

Box 2

What to Do After an Earthquake

- **Check yourself for injuries.** Often people tend to others without checking their own injuries. You will be better able to care others if you are not injured or if you have received first aid for your injuries.
- **Protect yourself from further danger by putting on long pants a long-sleeved shirt, sturdy shoes and work gloves.** This will protect you from further injury by broken object.
- **After you have taken care of yourself, help injured or trapped persons but don't** try to move seriously injured people unless they are in immediate danger of further injury.
- **Look for and extinguish small fires. Eliminate fire hazards.** Putting out small fires quickly, using available resources. Will prevent them from spreading. Fire is the most common hazard following earthquakes. (Fires followed the san Francisco earthquake of 1906 for three days, creating more damage than the earthquake)
- **Clean up spilled medicines, bleaches, gasoline, or other flammable liquids immediately.** Avoid the hazard of a chemical emergency.
- **Open closet and cabinet doors cautiously.** Contents may have shifted during the shaking of an earthquake and could fall, creating further damage of injury.
- **Inspect your home for damage.** Get everyone out if your home is unsafe. Aftershocks following earthquake can cause further damage to unstable buildings. If your home has experienced damage, get out before aftershocks happen.
- **Help neighbors who may require special assistance.** Elderly people and people with disabilities may require additional assistance. People who care for them or who have large families may need additional assistance in emergency situations.
- **Listen to a portable, battery-operated radio (or television) for updated emergency information and instruction.** If the electricity is out, this may be your main source of information. Local radio and local officials provide the most appropriate advice for your particular situation.
- **Expect aftershock.** Each time you feel one, drop cover and hold on! Aftershocks frequently occur minutes, days, weeks and even months following an earthquake.
- **Watch out for fallen power lines or broken gas lines and stay out of damaged area.** Hazard caused by earthquake are often difficult to see **and** you could be easily injured.
- **Stay out of damaged building. If you are away** from home, return only when authorities say it is safe. Damaged building may be destroyed by aftershocks following the main quake.
- **Use battery-powered lanterns or flashlights to inspect your home.** Kerosene lanterns, torches, and candles and matches may tip over or ignite flammable inside.
- **Inspect the entire length of chimneys carefully for damage.** Unnoticed damage could lead to fire injury from falling debris during an aftershock. Cracks in chimneys can be the cause of a fire years later.
- **Take picture of the damage, both to the house and its contents, for insurance claims.**
- **Avoid smoking inside building.** Smoking in confined areas can cause fires

- **When entering buildings, use extreme caution.** Building damage may have occurred where you least expect it. Carefully watch every step you take.
- **Examine walls, floor, doors, staircases, and windows to make sure that the building is not in danger of collapsing.**
- **Check for gas leaks.** If you smell gas or hear a blowing or hissing noise, open a window and quickly leave the building. Turn off the gas, using the outside main valve if you can, and call the gas company from a neighbor's home. If you turn off the gas for any reason, it must be turned back on by a professional.
- **Look for electrical system damage.** If you see sparks or broken or frayed wires, or if you smell burning insulation, turn off the electricity at the main fuse box or circuit breaker. If you have to step in water to get to the fuse box or circuit breaker, call an electrician first for advice.
- **Check for sewage and water line damage.** If you suspect sewage lines are damaged, avoid using the toilets and call a plumber. If water pipes are damaged, contact the I&PH Department and avoid using water from the tap.
- **Watch for loose plaster, drywall, and ceilings that could fall.**
- **Use the telephone only to report life-threatening emergencies.** Telephone lines are frequently overwhelmed in disaster situations. They need to be clear for emergency calls to get through.
- **Watch animals closely. Leash dogs and place them in a fenced yard.** The behavior of pets may change dramatically after an earthquake. Normally quiet and friendly cats and dogs may become aggressive or defensive.

Figure: Earthquake zones in India

3.4.19 STAMPEDE AT RELIGIOUS PLACES

Stampedes have been common to popular area, with most occurring during religious gatherings. In Una district Mata Shri Chintpurni temple, Baba Badbhag Singh, Pir Nigaha and Pir- Gauns- Makrair are religious places, but **Mata Chintpurni temple** is main religious place where there is mass gathering of pilgrimages throughout the year.

3.4. 19.1 Brief History of Temple Mata Shri Chintpurni:

Temple Mata Chintpurni is situated in Village Chhaproh (Chintpurni) in Tehsil Amb. Sh.Mai Dass an ardent devotee of Maa Durga about 600 years ago founded a Pindi of Maa Durga which was later converted into a temple by the devotees of Maa Durga knowing Mata Shri Chintpurni. Since then three Melas in a year are being celebrated namely Chetra Navratra, Sawan Ashtami Mela and Assuj Navratra Fair of ten days each. Besides this New Year fair is also being celebrated since 2009 on every "New Year Day". The following numbers of visitors have been paid their obiesance in last few years:

<u>Year</u>	<u>No.of visitors</u>
2008	28.25 lacs approximately.
2009	29.60 lacs --do-
2010	32.90 lacs --do-
2011	35.55 lacs -do-
2012	38.49 lacs -do-

3.4. 19.2 Action Plan to prevent stampede:

The crowd has unknowingly self- destructive itself. To prevent a stampede, the whole area has been divided into sectors under supervision of Sector Incharge. A control room at Temple area has been set up to look after the whole area. Video analysis system (CCTV) has been automated installed in all sectors. Necessary directions are sent out to control the crowd. This system is being used for crowd monitoring, scheduling and control. The open spaces, corridor and building in a dense moving crowd are marked during the gathering. Alternate exit points, corridors are also made in each sector.

CHAPTER 4

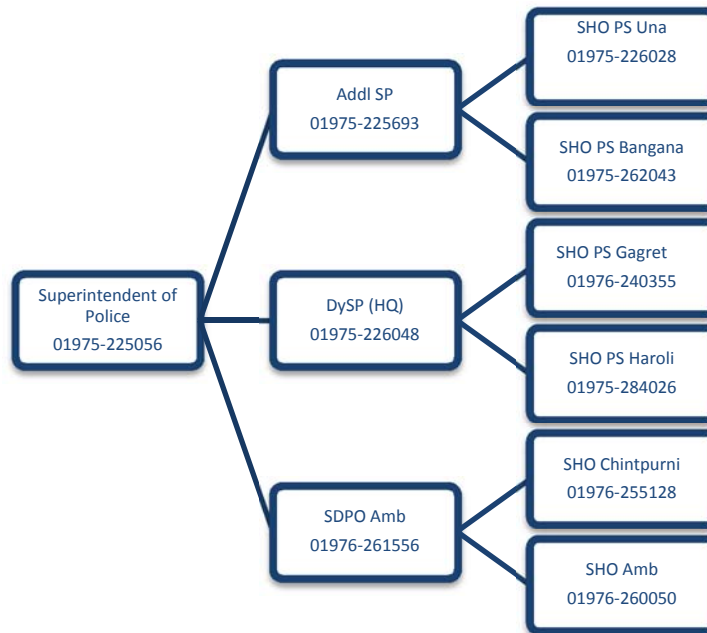

RESOURCE INVENTORY/ CAPACITY ANALYSIS

4.1 POLICE RESOURCES

4.1.1 DISTRICT POLICE

District Police in Una is headed by Superintendent of Police and he is assisted by Additional SP and Dy SP (HQ) for Police administration. District Police has major role to play in disaster management as it has trained manpower that can be deployed any time for management of natural or man-made disasters. Police administration in Una is administered through six Police stations, five Police posts and five Police check posts as under:

In the time of disaster the telephone contact numbers of Una district Police are as under:-

POLICE POSTS;

1. Police Post, Mehatpur 01975-232012
2. Police Post, City Una 01975-226175
3. Police Post Santoshgarh 01975-256220
4. Police Post Daulatpur Chowk 01976-265058
5. Police Post Pandoga 01975-241728

CHECK POSTS:

1. Check Post, Mehatpur 01975-232547
2. Check Post, Marwari
3. Check Post., Gagret 01976-241125
4. Check Post, Pandoga
5. Check Post, Polian

QUICK REACTION TEAM OF POLICE HEADED BY DY. SP (HQ)

In order to deal with emergency situations, District Police has constituted a standing quick reaction team headed by Dy SP (HQ) as under:

- 1 ASI Mohinder Singh –TTR Bangana
- 2 ASI Bhagat Ram-TTR Una
- 3 HC Sanjay Kumar-47 SIU
- 4 HC Karanjeet-85 PP city
- 5 HC Naresh Kumar-86 SIU
- 6 LHC Bodh Raj-367 PL Una
- 7 LHC Rajeev Kumar-214 PL Una
- 8 Ct. Ram Gopal-247 SIU
- 9 LHC Gurbir Singh-134 SIU
- 10 Ct. Satpal-276 P.L Una
- 11 Ct. Ajay Kumar-394 P.P Mehatpur
- 12 Ct. Vinod Kumar-104 C.P Polian
- 13 Ct. Tilak Raj-222 P.S. Una
- 14 Ct. Jaswinder Singh-239 SDPO Amb
- 15 Ct. Upnesh Kumar-307 PP City
- 16 Ct. Mohan Lal – 126 PS Una
- 17 Ct. /Driver Jatinder Kumar -364 PL Una

EQUIPMENT WITH QRT

- 1 BP Vests
- 1 Night Vision Devices.

- 2 Binoculars.
- 3 1 LMG each
- 4 For ASI – Carbine / Sten Gun
- 5 AK -47 for HCs / Cs.
- 6 Grenade (6 No.)
- 7 Extra ammunition with magazines for weapons
- 8 Ropes
- 9 Search lights and Torches.
- 10 HH Metal Detectors
- 12 Pistol for G.O.
13. One Walkie Talkie Set.

MOBILITY /VEHICLES OF QRT

HP-20 B-7575 Tata Bus P.L. Una along with driver is earmarked for QRT. Besides this, vehicle No HP-20-2995 Tata Mobile is also available with QRT if required.

SUPERVISION

Currently Sh. Manoj Kumar, Dy. Superintendent of Police (HQ) Una is responsible for proper preparedness and performance of QRT.

4.1.2 FIRST IRB BANGARH

First IRB Bangarh is one of the major organisations that would be deployed for disaster situation to maintain law and order in the district. The battalion has one dedicated disaster management company comprising of 100 trained men and they undergoes continuous training for disaster management round the year. Recently a course on earthquake, cloudbursting, flood control, fire fighting and disaster management has been organised at Battalion headquarters and training was imparted to the jawans in order to meet out any eventuality pertaining to disaster management with available resources.

In this regard, updated phone/mobile nos. office's and officers are as under:-

- | | | |
|----|--------------------------------------|-------------------------------|
| 1) | Sh.D.K Chaudhary, HPS, Commandant | M.94180-67672 O) 01975-230730 |
| 2) | Sh.Ravinder Kumar, HPS Dy.Commandant | M.94184-99055 |
| 3) | Sh.Bhajan Dev, HPS, Dy.S.P | M.94186-45368 |
| 4) | Smt.Rani Devi, HPS, Dy.S.P | M.94180-60739 |

4.2 HEALTH:

District has a good network of health institutions throughout the district and there is one regional hospital at Una, three CHCs, and 19 PHCs, 134 HSCs, 70 Ayurveda institutions and one ESI Hospital at Mehatpur. Besides this, there are 23 private hospitals in the district whose services could be availed for Disaster Management. Quick reaction teams of health and ayurveda department has been constituted at district and block headquarters and these teams are eveready to rush to disaster affected areas whenever required.

Health & Family Welfare Department

Disaster Management Plan

Details of different Health Institutions:

Disaster:- Means a catastrophe, mishap, calamity or grave occurrence in any area, arising from man made causes, or by accidents or negligence which results in substantial loss of life or human suffering or damage to and destruction of property or damage to or degradation of environment and is of such a nature or magnitude as to be beyond the coping capacity of the community of the effected area.

Disaster Management: - Means a continuous and integrated process of planning, organizing, coordinating and implementing measures which are necessary for:-

- i) Prevention of danger or threat of any disaster.
- ii) Mitigation or reduction of risk of any disaster or its severity or consequences.
- iii) Capacity building
- iv) Preparedness to deal with any disaster
- v) Prompt response to any threatening disaster situation or disaster.
- vi) Assessing the severity or magnitude of effects of any disaster.
- vii) Evacuation, rescue and relief.
- viii) Rehabilitation and re- construction.

Administrative setup:-**District Level**

CONTACT DETAILS OF AIR FORCE STATION SARSAWA, SAHARANPUR, U.P (For Requisition and Deployment of Helicopters in Disasters)

The Air Force Station Sarsawa Saharanpur (U.P) is the response center for Himachal Pradesh for Air relief operations and the Requisition and Deployment of Helicopters in Disasters will be made for this Air Force Station.

Name	Designation	Contact No.	Address
Mr. Bhanu Johri	Group Captain and Station Incharge	Tel No. 01331 244919-207 Fax No. 01331 - 244822	AF Stn, Sarsawa Saharanpur (UP), PIN - 247232
Mr. Vineet Sharma	Wing Commander, Chief Operations Officer	As Above Cell No. + 91 7599342240	As Above

5.2 NATIONAL DISASTER MANAGEMENT AUTHORITY (NDMA)

The NDMA, as the apex body for disaster management in the country, is headed by the Prime Minister and has the responsibility for laying down policies, plans and guidelines for DM (and coordinating their enforcement and implementation for ensuring timely and effective response to disasters.) The guidelines assist the Central Ministers, Departments and States to formulate their respective DM plans. It approves the National Disaster Management and DM plans of the Central Ministries/Departments. It takes such other measures as it may consider necessary, for the prevention of disasters, or mitigation, or preparedness and capacity building, for dealing with a threatening disaster situation. Central Ministries / departments and State Government are expected to extend necessary cooperation and assistance to NDMA for carrying out its mandate. It oversees the provision and application of funds for mitigation and preparedness measures. NDMA has the power to authorize the Departments or authorities concerned to make emergency procurement of provisions or materials for rescue and relief in a threatening disaster situation or disaster. The general superintendence, direction and control of National Disaster Response Force (NDRF) are vested in and are executed by NDMA. The National Institute of Disaster Management (NIDM) works within the framework of broad policies and guidelines laid down by NDMA. The NDMA is mandated to deal with all types of disasters, natural or man-made. Whereas, such other emergencies including those requiring close involvement of the security forces and/ or intelligence agencies such as terrorism (counter-insurgency) law and order situation, serial bomb blasts, hijacking, air accidents, Chemical, Biological, Radiological and Nuclear (CBRN) weapon systems, mine disasters, ports and harbour emergencies, forest fires, oil field fires, and oil spills continue to be handled by the National Crisis Management Committee. NDMA may, however, formulate guidelines and facilitate training and preparedness activities in respect

of Chemical, Biological, Radiological and Nuclear (CBRN) emergencies. Cross cutting themes like medical preparedness, psycho-socio care and trauma, community based disaster preparedness, information & communication technology, training, preparedness, awareness generation etc. for natural and manmade disaster also engages the attention of NDMA in partnership with the stakeholders concerned. Resources available with the disaster management authorities at all level, which are capable of discharging emergency support functions, are made available to the nodal Ministries/ Agencies dealing with the emergences at times of impending disasters/ disasters.

5.3 THE NATIONAL EXECUTIVE COMMITTEE.

The National Executive Committee (NEC) comprises the Union Home Secretary as the Chairperson, and the Secretaries to the GOI in the Ministries/ Departments of Agriculture, Atomic Energy, Defence, Drinking Water Supply, Environment and Forests, Finance Expenditure, Health, Power, Rural Development, Science and Technology, Space, Telecommunications, Urban Development, Water Resources and the Chief of the Integrated Defence Staff of the Chiefs of Staff Committee as members. Secretaries in the Ministry of External Affairs, Earth Sciences, Human Resource Development, Mines, Shipping, Road Transport & Highways and Secretary NDMA are the special invitees to the meetings of the NEC.

The NEC is the executive Committee of the NDMA, and is mandated to assist the NDMA in the discharge of its functions and also ensure compliance of the directions issued by the Central Government. NEC is to coordinate the response in the event of any threatening disaster situation or disaster.

5.4 STATE DISASTER MANAGEMENT AUTHORITY (SDMA).

At the State Level, the SDMA, headed by the Chief Minister, lays down policies and plans for DM in the State. It approves the State Plan in accordance with the guidelines laid down by the NDMA, coordinate the implementation of the State plan, recommend provision of funds for mitigation and preparedness measures and review the developmental plans of the different departments of the State to ensure integration of prevention, preparedness and mitigation measures.

The State Government shall constitute a State Executive Committee (SEC) to assist the SDMA in the performance of its functions. The SEC is headed by the Chief Secretary to the State Government and it coordinate and monitors the implementation of the National Policy, the National Plan and the State Plan. The SEC also provides information to the NDMA relating to different aspects of DM.

5.5 DISTRICT DISASTER MANAGEMENT AUTHORITY (DDMA)

The DDMA is headed by the Deputy Commissioner with the elected representative of the local authority (Chairman Zila Parishad) as the Co-Chairperson. DDMA acts as the planning, coordinating and implementing body for DM at the District level and take all necessary measures for the purposes of DM in accordance with the guidelines laid down by the NDMA and SDMA. It inter alia prepares the District Disaster Management Plan for the District and monitor the implementation of the National Policy, the State Policy, the National Plan, the State Plan and the District Plan. DDMA also ensures that the guidelines for prevention, mitigation, preparedness and response measures laid down by the NDMA and SDMA are followed by all Departments of the State Government at the District Level and the local authorities in the District.

5.6 DISTRICT DISASTER MANAGEMENT MECHANISM IN UNA DISTRICT

5.6.1 DISTRICT LEVEL DISASTER MANAGEMENT AUTHORITY.

CHAPTER-6

EMERGENCY SUPPORT FUNCTIONS & STANDING OPERATING PROCEDURES

6.1 Emergency Support Functions

The Emergency Support Functions is a mechanism that consolidates multiple agencies that perform similar or like functions into a single, cohesive unit to allow for the better management of emergency response functions. The District Una must be prepared to respond quickly and effectively on a 24-hour basis to developing events. When an event or potential event is first detected, the Disaster teams are activated to a level appropriate to the magnitude of the threat. The disaster response effort is then initiated through the District Emergency Response Team. The culture of working together with full spirit of enthusiasm with all organization will be adopted in the time of emergency. Under the Emergency Support Function concept, Police department will do the rescue & search operation. For rescue & search operation will take the help of Home guard, NCC volunteer, NSS Volunteer and other NGO's. The exchange of correct information in disaster /emergency is important, in order to ensure the resources necessary to support response and recovery activities. On the failure of telephone/mobile communication, wireless communication system will become active at District level as well as police station level. A strong wireless system will be set up by team of wireless of police station at the disaster site for correct information and recovery activities of disaster. The following are the duties of police during the disaster.

- SHO of concerned area in which disaster will take place will immediately intimate the SP, SO, DC and control room with detail of site and incident.
- Team at Police station level under the command of SHO will immediately rush to the site and rescue and search operation will be started immediately.
- SHO will intimate SP & SO with factual/ correct position of incident.
- DySP (HQ) with disaster management team from Una will immediately rush to the site with equipments of rescue operation and will start rescue operation at the site.
- Disaster situations draw in crowds. There will be some people hoping for a glimpse of the unfolding drama. Family members and friends of the victims will be show up, hoping to glean information about their loved ones. The people involved in the situation will also be milling around, sometimes while injured or in shock. The police will cordon off areas and work to keep crowds under control
- Police team might go from house to house searching for the injured or needy. They can offer transportation, emergency medical care, and be a bridge between citizens and rescue personnel. They can check the credentials to see if someone really needs to be in the area. They can warn people when electric wires are on the ground, when dangerous pests are lurking around or when unstable people are nearby.
- SO/SHO will arrange the guard to protect the property of the victim at the site.
- SO/ SHO will ensure the smooth running of the traffic. Many disasters wipe out infrastructures such as electricity, making an unsafe situation for both traffic and pedestrians. The police can close unsafe roads where downed wires, trees or flood situations might make travel unsafe. Police can direct citizens through non-working traffic lights. They can re-route random traffic to safer roads and try to keep out all unnecessary traffic away. They can put roadblocks in the areas where the crisis is still underway.

During disaster emergency in Una, the following police officers from Una district will be the Nodal officers at police station level. Additional Superintendent of Police, Una will be the nodal officer of police station Una and Bangana, Deputy Superintendent of Police (HQ) Una will be the nodal officer of police station Gagret and Haroli and SDPO Amb will be the nodal officer of Police Station Amb and Chintpurni during any disaster emergency in the jurisdiction of police station. Nodal officer will be

responsible for the rescue and search operation during disaster. They will coordinate with various distt. agency to carry out response and recovery missions.

Preventive Plan at the time of Disasters:

Mitigation is the most cost-efficient method for reducing the effect of hazards although not always the most suitable. Mitigation includes providing regulations regarding evacuation, sanctions against those who refuse to obey the regulations (such as mandatory evacuations), and communication of risks to the public.

Mitigation efforts are attempts to prevent hazards from developing into disasters altogether or to reduce the effects of disasters. Mitigation is the effort to reduce loss of life and property by lessening the impact of disasters. This is achieved through risk analysis, which results in information that provides a foundation for mitigation activities that reduce risk, and flood insurance that protects financial investment, The mitigation phase differs from the other phases in that it focuses on long-term measures for reducing or eliminating risk The implementation of mitigation strategies is a part of the recovery process if applied after a disaster occurs.

Mitigation measures can be structural or non-structural. Structural measures use technological solutions like flood levees and building retrofitting for earthquakes. Non-structural measures include legislation, land-use planning (e.g. the designation of non-essential land like parks to be used as flood zones), and insurance.

With the established and anticipated disaster programs, communities can prepare and recover faster, however we must not forget the severity of any disaster and we must remember to be prepared for all of them.

Disaster mitigation is the ongoing effort to lessen the impact disasters have on people and property. Because of the varying degree of each natural disaster, there are different mitigation strategies for each. The following are some important recommendations for protection against disaster of Earthquake, flood, storm, landslides and stampede.

EARTH QUAKE MITIGATION

Before The Disaster	During the Disaster	After the Disaster
<ul style="list-style-type: none"> • Check for hazards in the home • Identify safe places in each room • Locate safe places outdoors • Ensure all family members know how to respond after an earthquake • Develop an emergency communications plan in case of separation during the earthquake • Ask an out-of-state relative or friend to serve as the family contact 	<ul style="list-style-type: none"> • If indoors: Take cover under a piece of heavy furniture or against an inside wall and stay inside • If outdoors: Move into the open, away from buildings, street lights, and utility wires and remain there until shaking stops • If in a moving vehicle: Stop quickly, stay in vehicle, move to a clear area away from buildings, trees, overpasses, or utility wires 	<ul style="list-style-type: none"> • Be prepared for after shocks • Help injured or trapped persons and give first aid where appropriate • Listen to a battery operated radio for emergency information • Stay out of damaged buildings and return home only when authorities say it is safe

FLOOD MITIGATION

<ul style="list-style-type: none"> • Learn warning signs and community alert systems • Stockpile emergency building materials • Install check valves in sewer traps to prevent flood waters from backing up in sewer drains • Plan and practice an evacuation rout • Have disaster supplies on hand • Develop an emergency communication plan in case of separation • Ask an out-of-state relative to serve as the "family contact" • Teach family members how and when to turn off the gas, electricity, and water and teach children how and when to call helpline number 	<ul style="list-style-type: none"> • During a flood watch: If indoors: <ul style="list-style-type: none"> • Turn on battery operated radio to get latest emergency information • Get pre-assembled emergency supplies • If told to leave, do so immediately. If outdoors • Climb to high ground and stay the • Avoid walking through any floodwaters. • If in a car, turn around and go another way; if your car stalls, abandon it immediately and climb to higher ground. During an evacuation: <ul style="list-style-type: none"> • If advised to evacuate, do so immediately to avoid flooded roads, being sure to follow recommended evacuation routes and listen to radio for evacuation instructions 	<ul style="list-style-type: none"> • Don't return home until authorities express it is safe to do so • Help neighbors whom may need assistance • Use extreme caution when entering buildings • Inspect foundations for cracks or other damage and examine walls, floors, doors, and windows to make sure that the building is not in danger of collapsing. • Watch out for animals, especially poisonous snakes, that may have come into your home with flood waters • Watch for loose plaster and ceilings that could fall. • Take pictures of damage for insurance claims. • Look for fire hazards • Throw away all food (including canned) that has come in contact with flood waters. • Pump out flooded basements gradually (~ 1/3 amount of water per day) to avoid structural damage • Service damaged septic tanks, cesspools, pits, - damaged sewage systems are health hazards.
---	---	--

STORM/HURRICANE MITIGATION

Before The Disaster	During the Disaster	After the Disaster
<ul style="list-style-type: none"> • Plan an evacuation route and learn safe routes inland • Have disaster supplies on hand • Develop an emergency 	<ul style="list-style-type: none"> • Storm /Hurricane Watch (conditions within 24-36 hours): • Listen to battery-operated radio for progress reports; check emergency supplies • Fuel car • Bring in outdoor object 	<ul style="list-style-type: none"> • Stay tuned to radio for information, returning home only when authorities advise it is safe to do so. • Help injured or trapped persons and give first aid where appropriate.

<p>communication plan in case of separation</p> <ul style="list-style-type: none"> • Ask an out-of-state relative to serve as the "family contact" • Teach family members when and how to turn off gas and electricity. • Trim back dead or weak branches from trees. • Check into flood insurance. • Make arrangements for family pets because some emergency shelters may not allow pets 	<ul style="list-style-type: none"> • Secure buildings by closing and boarding up window • Remove outside antennas • Turn refrigerator and freezer to coldest settings • Store drinking water in clean bathtubs, jugs, and bottles. • Moor boat securely or move to a designated safe place; anchor trailer to ground. • Review evacuation plan Hurricane Warning (conditions expected in 24 hours or less): • Listen to radio for instruction • Tie down mobile home and evacuate immediately. • Store valuables in waterproof container. • Avoid elevators. • If at home: • Stay inside, away from anything glass. • Keep a supply of batteries and flashlights. • Avoid open flames as a source of light. • If power is lost, turn off major appliances to reduce power "surge." • If evacuation is necessary: avoiding flooded roads and washed-out bridges. • Secure home by unplugging appliances and turning off electricity and the main water valve. • If time permits, elevate furniture to protect it from flooding. • Bring pre-assembled emergency supplies and warm clothing. • Take blankets and sleeping bags to a shelter and leave immediately 	<ul style="list-style-type: none"> • Avoid loose or dangling power lines and report them to the power company or fire department • Beware of snakes, insects, and animals driven to higher ground by flood water. • Open windows and doors to ventilate and dry your home • Check refrigerated foods for spoilage. • Take pictures of the damage for insurance claims. • Drive only if necessary and avoid flooded roads and washed-out bridges. • Use telephones only for emergency calls.
---	---	--

STAMPEDE MITIGATION

Stampedes have been common to populous India, with most occurring during religious gatherings. Mata Chintpurni temple, Baba Badbhag Singh, Pir Nigah and Pir Goush Makrer are main religious place of Una district where mass gatherings of pilgrimages throughout the year. There have been stampedes at recruitment drives of the Army and at various other types of gatherings. Like tremors of an earthquake, the situation becomes uncontrollable, moves beyond the power of security forces, if any. The mass splits up into clusters, spreading with strong velocity in all possible directions. People are pushed around, some stumble and fall and, if they cannot get up fast, are trampled upon. Soon, the area of trampled people becomes larger and larger as they become obstacles to others. The crowd has unknowingly self-destructed itself.

To prevent a stampede, the whole area will be divided in to sector and with sector Incharge.

A control room at temple area will be setup to look after the whole area. Video analysis system (CCTV) be automated in all sectors and directions will be sent out to control the crowd. This system will used for crowd monitoring, scheduling and control.

The open spaces, corridor and building in a dense moving crowd will be marked. **Alternate exits points, corridor will be made in each sector.**

Barricades will use for crowd control they should be used to control traffic, both vehicular and pedestrian, safely through. Separation of people into blocks to stop the spreading of shock waves will also made through barricades.

To stop the crowd from reaching this stage, advance warning system will ready for "critical crowd conditions".

The use of modern technology such as computer simulation of crowds, to test the suitability of a venue virtually in a computer, before the gathering, and also to use any mean of real-time crowd counting during the event, to be able to take action in case the event does not unfold according to plan Stampede, of late has emerged as one of the major risks in any mass gathering, be it religious or political or cultural in our country. Whether the event organizers take sufficient preventive measures to prevent stampedes or not, we are on our own when it comes to saving our life and of others in such situations.

Though prevention of disasters like stampedes may seem foolish once they start happening, surviving such accidents is very much possible if you observe the following tips:

1. The first and most important thing is to consciously make yourself familiar with your surroundings and mentally **notice alternate exits**. No matter where you are, make sure you always know how to get out.
2. Make yourself aware of the type of ground you are standing on: in a moving crowd wet or uneven ground can be slippery or hazardous.
3. Do not stand near or climb on chairs, benches, and barricades, temporary structures, such as the Dias/stage, the start/finish points in marathons, which could collapse under too much weight or pressure. Do not forget, if you do such things, hundred others would follow you in mass gatherings.
4. Be aware of the general atmosphere of the event, as panic situations can often be easily anticipated. When in danger, few seconds can make all the difference, giving you the possibility of taking advantage of your escaping route. **Stay always closer to the escape route.**
5. Panicked crowds move fast and release an incredible amount of energy, usually compared to the energy generated by a running train: once a crowd gets moving it is very hard to stop, and the flow of people could literally sweep you off your feet.
6. So, if you find yourself in the middle of a moving crowd **do not** fight against the pressure, **do not** stand still or sit down, because you could easily get trampled.
7. Instead, move in the same direction of the crowd; take advantage of any space that may open up to move sideways to the crowd movement where the flow is weaker.
8. If you fall, get up quickly. If you can't get up because you are injured, get someone to pull you back up. If you have kids, lift them up.
9. Because the noise level in a crowd could be too loud for shouting to be effective, **use gestures to communicate** to each other. Always remember, in stampedes everyone will be running scared to get out of the place.
10. Grab your friend's hand or shoulder to remain together. Alternatively, decide on a gathering point where you will meet and account for each other, should you get separated.
11. If you fall and cannot get up, keep moving by crawling in the same direction of the crowd, or if that is not possible, then **cover your head with your arms and curl up into the fetal position (do not lay on your stomach or back, as this dangerously exposes your lungs).**
12. The worst scenario is to be pushed by the crowd against an immovable object. Try to stay away from walls, fences or barricades, as the crowd pressure can build up rapidly. On the other hand, if you are at the back of a crowd that looks jammed, **do not push it**, as it could pose a threat to someone else safety.

13. Always make sure the chappals are always under your feet, laces of your shoes are tied so you do not trip and fall. If you lose your chappal/shoes/lungi/dhoti/saree etc in a crowd crush or stampede, do not stop or backtrack to get them. The same is valid for all personal belongings (money, cellular phone, spectacles, water bottles, hand bags etc): if they fall, just abandon them and keep moving in the same direction of the crowd.
14. We are strictly against taking children, old people and physically challenged to large crowd gatherings as they are the first victims in any stampede. If it is not avoidable, keep them always with you and hold them up (even if with the help of others) in case of stampede happening.
15. If you are visiting a pilgrim place in its peak season, reserve your tickets early. Know whether there were any stampedes earlier, talk to the people who just returned from the place about arrangements, whether the authorities taken extra measures etc.
16. Avoid moving in huge crowds especially in the small hours of day (between 3AM and 6AM) as many volunteers and police personnel are not expected to be active during that period which eventually leaves the crowd to take decision on their own.
17. Visit and enjoy only the places where adequate crowd control measures are in place. Remember! You have only one life to live

6.2 STANDING OPERATING PROCEDURE

The Standing Operating procedures (SOPs) for ESFs explain about the operations and responsibilities of the leading and supporting agencies that are to be involved in the ESF system. Disaster management Plan outlines the purpose and scope for each function of operation that is to be followed by the respective ESF agencies when the Distt. Administration activates the response plan during the emergency period. The head of each primary department who is the Team Leader of each ESF and the nodal Officers of the supporting agencies are responsible to be prepared for potential hazards that might impact the district severely.

6.3 COMMUNICATION

BACKGROUND; The Communication ESF is primarily responsible for restoration of communication facilities. The ESF on Communication should ensure the smooth flow of information that can cater to the outreach in a time-sensitive manner at State/ District level in response efforts.

SITUATION ASSUMPTIONS;

- 1 There would be a congestion in the network because of increased calls to control rooms due to panic created in the community.
- 2 The initial reports on damage may not give a clear picture of the extent of damage to communication network.
- 3 The affected site may cut off from the State Control Rooms and the officials on site may find difficulty in communicating to the District/ State control rooms.

NODAL AGENCY: BHARAT SANCHAR NIGAN LTD. (BSNL) TEAM LEADER: DE TELECOM, UNA

SUPPORTING AGENCIES; NIC, POLICE, HPSEB AND PRIVATE TELECOM/ MOBILE OPERATORS SOP FOR NODAL AGENCY:

- 1 Team leader (TL) of Communication ESF will activate the ESF on receiving the intimation of occurrence of the Disaster from the District Control Room.
- 2 TL would inform Nodal Officers (NOs) of support agencies about the event and ESF activation.
3. TL request for reports from local ESF contact persons to understand the current situation and action taken;
- 1 Based on information given by the supporting agencies, TL decide on the need to launch an assessment mission to estimate the extent of damage to telecom services and network as well as to come up with possible arrangements to establish reliable and appropriate network.
- 2 TL communicates the situation to supporting agencies and also requests to provide details on the status of equipment and infrastructure in the affected area(s).
- 3 TL informs the Distt. Magistrate / Additional District Magistrate on the status of telecom services.
- 4 TL works out a plan of action for private telecom companies and convenes a meeting of all ESF members to discuss and finalize the modalities.
- 5 TL issues orders to establish systems and reports to District Control Room on the action taken. New phone numbers and details of contact persons would also be communicated.

- 6 TL gets the temporary telephone facilities established for the public. Prior information on this would be announced through media.
- 7 TL monitors the situation and arranges emergency staff required to operate established systems.
- 8 TL sends the District Quick Response team at the affected site with the required equipments and other resources.

SOPS FOR QUICK REACTION TEAM ON COMMUNICATION:

- 1 The QRT (Quick Response Team) members will reach the nodal office as soon as they get instructions from the TL.
- 2 Once the QRTs receive any intimation from the Nodal Officer to reach the site, they would rush to the site.
3. At the emergency site, QRT members will take stock of the situation and also find out about their counter parts.
4. QRTs would assess the ground situation and would send sectoral report to the District ESF agency.

A SECTORAL REPORT WOULD CONTAIN FOLLOWING:

- 1 An assessment of overall damage, listing specifically;
- 2 Over head route damage (in miles. kilometers).
- 3 Cable damage (in yards/ meters).
- 4 Specific equipment damaged.
- 5 Establish a temporary communication facility for use by the public.
- 6 Identify requirements of manpower, vehicles and other materials and equipments. Give priority and concentrate on repairs and normalization of communication system at disaster-affected areas.
- 7 Begin restoration by removing and salvaging wires and poles from the roadways through recruited casual laborers.
- 8 Establish a secure storage area for incoming equipments and salvaged materials.

6.4 EVACUATION:

BACKGROUND:

The ESF on evacuation is primarily responsible for establishing evacuation plans, identification of fastest evacuation routes, establishing alternate routes and coordinating evacuation logistics during field operations.

SITUATION ASSUMPTIONS:

1. Most of the buildings would be damaged and would not remain serviceable.
2. Many structures would be damaged and there would be an urgent need to evacuate.

NODAL AGENCY: DEPARTMENT OF REVENUE TEAM LEADER: ADDITIONAL DEPUTY COMMISSIONER.

SUPPORTING AGENCIES: POLICE, HOME GUARDS, 1st IRB BANGARH, NEHRU YUVA KENDRA

SOPS FOR NODAL AGENCY:

- 1 Team leader (TL) of Evacuation ESF would activate the ESF on receiving the warning of the disaster from District. Control Room.
- 2 TL would inform Nodal Officers (NOs) of supporting agencies about the event and ESF activation.
- 3 TL will direct the QRT to be deployed at the affected site.
- 4 TL will gather information on availability of pre defined avacuation routes.
5. Where the predefined evacuation routes are not available, the nodal officer would coordinate through District Control Room with other identifying alternate routes.

SOPS FOR QUICK RESPONSE TEAM ON EVACUATION:

- 1 The QRT members will reach the nodal office as soon as they get instructions to do so from the TL.
- 2 Once the quick response teams receive an order from the nodal officer for reaching the site they would rush to the site.
- 3 On reaching the site, the QRT members will take stock of the situation from the Incident Management Team at the site and their counterparts.
- 4 The Quick Response Team with the help of local task forces will start evacuating peoples to safe shelters or open areas.
- 5 The QRT members should concentrate more on evacuation in areas that have been worst affected by the

disasters.

6 QRT will Report all activities to the TL/control rooms.

6.5 SEARCH AND RESCUE:

1. **BACK GROUND:** Search and Rescue operations are one of the primary activities taken up in a post disaster situation. The promptness in these operations can make a remarkable difference in the quantum of losses to the life and property.

SITUATION ASSUMPTIONS:

- 1 Local Community task forces will initiate search and rescue at residential level.
- 2 Spontaneous volunteers will require coordination.
- 3 Access to affected areas will be limited.
- 4 Some sites may be accessible only through air routes.

NODAL AGENCY: DISTRICT POLICE.

SUPPORT AGENCY: CIVIL DEFENCE, NCC, ARMY AND HEALTH REPRESENTATIVES, DISTRICT FIRE SERVICES

SOP FOR NODAL AGENCY:

- 1 IC (Incident Commander/DC/ADC) will call the TL of Primary Agency and get the ESF activated.
- 2 TL of primary agency will call nodal officers of supporting agencies.
- 3 Quick Assessment of the S & R operations through AERIAL Surveys if needed.
- 4 Assessment of the specific skill sets and the other equipments required.

SOP FOR QUICK RESPONSE TEAM ON SEARCH & RESCUE:

- 1 Assessment of damage (Locations, number of structures damages, severity of damage)
- 2 The QRTs will be deployed at the affected site.
- 3 Enlisting the types of equipments required for conducting the S& R.
- 4 QRTs will report the situation and the progress in response activities to the respective control rooms.

6.6 LAW & ORDER:

BACKGROUND: The ESF on Law and Order protects the property and valuable commodities. It is mainly responsible to control crowd and avoid riots situations.

SITUATION ASSUMPTIONS:

- 1 There would be panic and people will gather at a place.
- 2 The crowds may go out of control.
- 3 Riots may also take place.

NODAL AGENCY: DISTRICT POLICE.

SUPPORT AGENCY: HOME GUARDS, CIVIL DEFENCE, ARMY, HOME GAURDS

SOPS FOR NODAL AGENCY:

- 1 District Magistrate will call the TL of Primary Agency and get the ESF activated.
- 2 TL of Primary agency will call nodal officers of supporting agencies.
- 3 TL would activate the District Quick Response Team.
- 4 The QRTs will be deployed at the affected site.
- 5 Cordoning of area to restrict movement of onlookers, vehicular and pedestrian traffic should be done
- 6 Any additional requirement at site to be taken care of.

SOPS FOR QUICK RESPONSE TEAM ON LAW AND ORDER:

1. Quick assessment of law and order situation in affected areas.
2. Support and coordinate with Local Administration.
3. Prepare updates on the law and order situation every 4-6 hours and brief the authorities.
4. Controlling situations like rioting and looting and cordon off sensitive areas.
5. QRTs will guard property and valuables in affected areas,
6. Control and monitor traffic movement.
7. QRTs will provide diversion of traffic on alternate routes as and when it is necessary.
8. The QRTs will also provide information about traffic flow along various corridors, especially heavy traffic or congested roads,

9. QRTs will communicate to police control rooms, details on the field activities including deployment and reinforcement of staff and resources and communicate nature of additional requirements.

6.7 – MEDICAL RESPONSE AND TRAUMA COUNSELING:

Background: The ESF on Medical Response and Trauma Counseling will look after emergency treatment for injured people immediate after the disaster take place.

SITUATION ASSUMPTION:

- 1 Emergency Medical Services will be required by affected population.
- 2 Likely outbreaks of epidemic diseases after the disaster.
- 3 Hospital Services would be affected.

NODAL AGENCY: CHIEF MEDICAL OFFICER, UNA.

SUPPORT AGENCIES: DISTRICT RED CROSS, CIVIL DEFENCE, NSS, PRIVATE HOSPITALS.

SOPS FOR NODAL AGENCY:

- 1 Distt. Magistrate will call the TL of Primary Agency and get the ESF activated.
- 2 Team leader (TL) of Primary Agency will call Nodal Officers of supporting agencies.
- 3 In coordination with the transportation ESF, it will ensure that critical number of medical Professionals Including specialists from other Districts are reached at the site.
- 4 If temporary housing arrangements are being made for the affected population, the ESF must ensure high standards of sanitation in settlements in order to reduce epidemic outbreak.
- 5 Ensuring the provision and continuous supply of medical facilities (medicines, equipments, Ambulances, Doctors and manpower etc) required at the disaster affected site and the hospital/health centers catering to disaster victims.
- 6 In case of orthopedic care required in disasters like earthquakes, the immediate response Would
- 7 have to be complemented by a follow up treatment schedule for a majority of the patients in/near their places of residence.
- 8 Trained professionals should be mobilized by psycho-social support.
- 9 Ensuring setting up of temporary information centers at hospitals with the help of ESF through help lines and warning dissemination systems.
- 10 TL will coordinate, direct and integrate state level response to provide medical and sanitation health assistances.
- 15 On the recommendations of the ODMA, the TL is also responsible to:
 1. Send required medicines, vaccines, drugs, plasters, syringes etc.
 2. Arrange for additional blood supply.
 3. Send additional medical personnel equipped with food, bedding and tents.
 4. Send vehicles and any additional medical quipment.

SOP FOR QUICK RESPONSE TEAM (QRT) ON MEDICAL RESPONSE AND TRAUMA COUNSELING

- 1 QRTs will provide situation and progress reports on the action taken by the team to the respective Control Room.
- 2 QRTs will assess type of injuries, number of people affected and medical assistance needs.
3. QRTs will ensure timely response to the needs of the affected victims such as:
 - a Establishing health facility and treatment centers at disaster sites.
 - b. Providing medical services as reported by Chief Medical Officer with District Management Authorities and State Disaster Management Authorities.
 - c. Procedure should be clarified in between Peripheral hospitals Private hospitals Blood Banks General Hospitals and Health services established at transit camps, relief camps and affected villages.

QRT should maintain check posts and surveillance at required places and all entry and exit points from the affected area, especially during the threat or existence of an epidemic.

6.8 WATER SUPPLY.

BACKGROUND: The ESF on drinking water and water supply will ensure provision of basic quantity of clean drinking water and water for other purposes in a manner that does not allow the spread of diseases

through the contamination of water.

SITUATION ASSUMPTIONS;

- 1 Existing water storage bodies will be damaged and unusable.
- 2 There would be an urgent need of water to assist victims in rescue operation.
- 3 Break down of sanitation system.
- 4 Contamination of water due to outflow from sewers or due to breakage of water pipelines.

NODAL AGENCY: I & PH. DEPARTMENT:

SUPPORT AGENCY: IRRIGATION AND FLOOD CONTROL, MUNICIPAL COMMITTEES AND NACs

SOP FOR NODAL AGENCY:

1. Team leader (TL) of ESF on Water Supply will activate the ESF on receiving the intimation of the Disaster from District Disaster Management Authority.
- 1 TL would inform Nodal Officers (NOs) of support agencies about the event and ESF activation.
- 2 TL will ensure special care for women with infants and pregnant woman.
- 3 Provide for sending additional support along with food, beddings and tents.
- 4 Send vehicles and any additional tools and equipments needed.

SOP FOR QUICK RESPONSE TEAM (QRT) ON WATER SUPPLY

- 1 QRT will ensure that supply of drinking water is made available at the affected site and relief camps. QRTs will ensure the temporary sewerage lines and drainage lines are kept separate.
2. QRTs will report the situation and the progress on action taken by the team to the EOC.
3. QRTs will intimate their TL about the additional resources needed.
4. Carry out emergency repairs of all damages to water supply systems.
5. Assist health authorities to identify appropriate sources of potable water.
6. Identify unacceptable water sources and take necessary precautions to ensure that no water is accessed from such sources, either by sealing such arrangements or by posting the department guards. Arrange for alternate water supply and storage in all transit camps, feeding centers, relief camps, cattle camps and also the affected areas, till normal water supply is restored.
7. Ensure that potable water supply is restored as per the standards and procedures laid down in "Standards for Potable Water".
 - a Plan for emergency accommodations for staff from outside the area.
8. QRTs will ensure timely response to the needs of the affected victims.
9. QRT will set up temporary sanitation facilities at the relief camp.

6.9 RELIEF (FOOD, CLOTHES AND SHELTER)

Background: In the event of a disaster there would be a need of disbursing relief materials due to massive destruction of life and property taken place. The ESF on Relief should ensure coordination of activities involving with the emergency provisions of temporary shelters, emergency mass feeding and bulk distribution of relief supplies to the disaster victims as also the disaster managers and relief workers.

SITUATION ASSUMPTIONS:

1. Probability of shortage of critical resources
2. Immediate assistance to the community at the time of resource shortage particularly, when the affected area is larger.

NODAL AGENCY: DEPARTMENT OF FOOD AND CIVIL SUPPLIES. NODAL AGENCY: DISTRICT FOOD AND SUPPLIES CONTROLLER

SUPPORT AGENCY: DEPARTMENT OF REVENUE, RED CROSS, NGOS.

SOPS FOR NODAL AGENCY:

- 1 TL will activate the ESF on receiving the information of the disaster from District EOC,
2. TL would inform Nodal Officers (NOs) of support agencies about the event and ESF activation.
3. Will coordinate with all state and district level suppliers as identified under DMP.
4. TL will coordinate with other ESFs related to transportation, debris and road clearance to ensure quality supply chain management of relief materials.

5. Ensuring composite relief with availability of complimentary relief material.

SOP FOR QUICK RESPONSE TEAM (QRT) ON RELIEF.

- 1 QRT will report to site of the relief camps.
- 2 QRTs will be responsible to management and distribute relief items to the affected victims.
- 3 QRTs will be responsible for reporting the progress on action taken by the team to the Control Room.
- 4 QRTs will provide information to their TL about the need of additional resources.
- 5 Clearing of the areas to establish relief camps.
- 6 Setting up relief camps and tents.
- 7 Assist local authorities to se up important telecom and other service related facilities.
- 8 Initiate, direct and market procurement of food available from different inventories and ensuring food supplies to the affected population.
- 9 Preparing take-home food packets for the families.
- 10 Ensuring distribution of relief material to the all the people including vulnerable groups of the target area such as women with infants, pregnant women, children, aged people and handicapped.
- 11 Ensuring support to Local Administration.
- 12 Locating adequate relief camps based on damage survey.
- 13 Develop alternative arrangements for population living in structures that might be affected even after the disaster.

6.10 EQUIPMENT SUPPORT, DEBRIS AND ROAD CLEARANCE:

Background: The important of this ESF emanates from the fact that most large-scale hazards such as earthquake and floods primarily affect the building structures.

SITUATION ASSUMPTIONS

- 1 Access to disaster-affected area would depend upon the re-establishment of ground routes. Early damage assessment may be incomplete, inaccurate and general. A rapid assessment may be required to determine response time.
- 2 Engineers and masons may be required in large scale for the inspection of present buildings.

NODAL AGENCY: HP PWD TEAM LEADER: & SE, HPPWD (B&R)

SUPPORT AGENCIES: MC, GRAM PANCHAYATS, DRDAS, BDOS.

SOP FOR NODAL AGENCY:

- 1 Team Leader (TL) will activate the ESF on receiving the information of the disaster from District Control Room.
- 2 TL would inform Nodal Officers (NOs) of support agencies about the event and ESF activation.
- 3 TL will coordinate with the supporting agency to mobilize equipments from the supporting agencies through database available in DMP
- 4 The respective supporting agencies will contact their respective personal to move the equipments to central warehouse.
- 5 The equipments like JCB, concrete cutters identified as per the need will be transported to the site.
- 6 As per the information, the nodal officer of Debris road clearance will make an assessment of the damage of roads and built structures at the site and surrounding areas.
- 7 The nodal Officers of Supporting Agencies will immediately start debris clearance operation to enable movement to the affected site.
- 8 Review of the current situation is taken up by the Nodal agency to update the support agencies and to delegate their respective personnel to take precautionary measure to plan de-routes for the transportation ESFs to be operational.
- 9 All supporting agencies will inspect the road and rail network and structures within the disaster site and surrounding.
- 10 TL will also ensure proper corpse disposal and post mortem by coordinating with ESF on medical response.

SOPs for Quick Response Team on Equipment support, debris and Road Clearance

- 1 Damage assessment including locations, number of structures damaged and severity of damage.
- 2 The QRTs will be deployed in the affected site.
- 3 Enlisting the types of equipments as compiled from DMP resources inventory required for conducting the debris clearance.
- 4 The QRTs will report the situation and progress activities to the respective control room.
- 5 Undertake construction of temporary roads to serve as access to temporary transit and relief camps and medical facilities for disaster victims.
- 6 Repairing of all paved and unpaved road surfaces including edge metalling, pothole patching and any failure of surface, foundations in the affected areas by maintenance engineer's staff and keep monitoring their conditions.

6.11 HELP LINES, WARNING DISSEMINATION;

Background: The ESF on help lines and warning dissemination should process and circulate information about the welfare of citizens of affected areas and managing the tremendous flow of information. The help lines will be responsible for providing, directing and coordinating logistical operations.

Situation Assumptions:

- 1 There may be a flood of information and confusion about the injured population.
- 2 The communication with affected areas may be partially impaired.

Nodal Agency: Department of Revenue

Support Agencies: DPRO, NIC,/ NGO Reps.

SOPs for Nodal Agencies:

- 1 District Magistrate will call the TL of Primary agency and get the ESF activated.
- 2 TL of primary agency will call nodal officers of supporting agencies.
- 3 TL would activate the District Quick Response Team.
- 4 The QRTs will be deployed at the affected site.
- 5 Ts will report the situation and the progress in response activities to the Respective control rooms
- 6 During flash news of latest updates/ donation requirements for disaster area all Over the State
- 7 Assisting the Control Room in providing updated information to State as well as at the District Level
- 8 Setting up of police numbers for emergency information assistance.

SOP for Quick Response Team on Help Lines & Warning Dissemination

- 1 The QRT member will reach to the nodal officer as soon as they get instructions.
- 2 QRT would reach the site immediately after receiving instructions from the nodal officer.
- 3 On the site, QRT members will take stock of the situation from the site.
- 4 The QRTs will coordinate, collect, process, report and display essential elements of Information and facilitate support for planning efforts in response operations.

6.12 ELECTRICITY

Background: The ESF on electricity will facilitate restoration of electricity distribution systems after a disaster. In the event of a disaster, there would be major electricity failure and many power stations damaged.

Situation Assumption:

- 1 Prolonged electricity failure.
- 2 The affected victims may be panicked.
- 3 Halt of all activities specially jamming of communication networking system in the affected site.

Nodal Agency: SE, HPSEB Ltd. & Support Agencies: Electrical Wing of PWD.

SOPs for Nodal Agency:

- 1 District Magistrate will call the TL of primary agency and get the ESF activated.
- 2 TL of primary agency will call nodal officers of supporting agencies.
- 3 TL would activate the District Quick response team.
- 4 The QRTs will be deployed at the affected site.
- 5 TL will dispatch emergency repair teams fully equipped with tools, tents and food.

SOP for Quick Response Team on electricity:

- 1 The QRT members will reach the nodal office as soon as they get instructions to do so from the TL.
- 2 QRT members would reach the site immediately after receiving instructions from the nodal officer.
- 3 On the site, QRT members will take stock of the situation from the site and their counter parts.
- 4 The QRTs will coordinate, collect, process, report and display essential elements of Information and facilitate support for planning efforts in response operations,
- 5 Begin repair and reconstruction work.
- 6 Assisting hospitals in establishing an emergency supply by assembling generators and other emergency equipments, if necessary.
- 7 The members of QRTs will establish temporary electricity supplies for public and private water systems.
- 8 The members of QRTs will establish temporary electricity supplies for transit camps, feeding containers, relief camps, District Control Room and own access to the same.
- 9 The members of QRTs will establish temporary electricity supplies for relief material godowns.
- 10 Report about all the activities to the head office.

6.13 TRANSPORTATION

Background: The ESF on transport should ensure smooth transportation links at State and Distt. level. In the disaster context, quick and safe movement of materials and humans are a priority. It should coordinate the use of transportation resources to support the needs of emergency support forces requiring transport capacity to perform their emergency response, recovery and assistance missions.

Situation Assumptions:

- 1 The State Civil Transportation infrastructure will sustain damage, limiting access to the disaster area.
- 2 Access will improve as routes are cleared and repaired.
- 3 The movement of relief supplies will create congestion in the transportation services.

Nodal Agency: Department of Transport/ RTO.

Support Agencies: HRTC, PWD, MC, Private Transporters. SOP for Nodal Agency.

- 1 TL of transportation ESF will activate the ESF on receiving the intimation of the disaster from the District Control Room.
- 2 TL would inform nodal officers (NOs) of support agencies about the event and ESF activation.
- 3 TL establishes contact with Control Room for FIR.
- 4 TL requests for reports from local transportation ESF contact person.
- 5 TL communicates situation to support agencies and requests for detailed information on the status of transportation infrastructures in the affected area (s).

SOPs for Quick Response Team on Transport:

- 1 The QRT members will reach to the nodal office as soon they will get instructions to do so from the TL.
- 2 As quick response teams will receive instructions from the nodal officer. They would reach to the site immediately.
- 3 QRTs would report the situation and the progress on action taken by the team to the respective control rooms.
4. QRT will send a requirement schedule for the different modes of transportations e.g.
5. Trucks, boats, helicopters to be put on stand-by.
6. QRTs will ensure timely re-establishment of the critical transportation links.
7. Compile and itemized assessment of damage, from reports made by various electrical receiving centers and Sub-Centers.
8. Reporting about all activities to all the head office.

ANNEXURE-4

List of Shelters in District Una (Sr.Secondary /Govt. High Schools/Block-wise)

1. Amb Block

Sr.No.	Name of GP/NP	Sr.No.	Name of Building
1	2	3	4

1	Amb	1	GSSS Amb
2	Behar Jaswan	2	GSSS Behar Jaswan
3	Bhanjal	3	GSSS Bhanjal
4	Bharwain	4	GSSS Bharwain
5	Chintpurni	5	GSSS Chintpurni
6	Dharamsal Mahantan	6	GSSS Dharamsal Mahantan
7	Daloh	7	GSSS Daloh
8	Dhussara	8	GSSS Dhussara
9	Diara	9	GSSS Diara
10	Ghangret	10	GSSS Ghangret
11	Gindpur Malon	11	GSSS Gindpur Malon
12	Jowar	12	GSSS Jowar
13	Lohara	13	GSSS Lohara
14	Mubarikpur	14	GSSS Mubarikpur
15	Nehri	15	GSSS Nehri
16	Polian Prohitan	16	GSSS Polian Prohitan
17	Rapoh Misran	17	GSSS Rapoh Misran
18	Saloi	18	GSSS Saloi
19	Suri	19	GSSS Suri
20	Thathal	20	GSSS Thathal
21	Andora	21	GHS Andora
22	Bhater	22	GHS Bhater
23	Chahbag	23	GHS Chahbag
24	Chaksarai	24	GHS Chaksarai
25	Dhalwari	25	GHS Dhalwari
26	Kalroohi	26	GHS Kalroohi
27	Mairi	27	GHS Mairi
28	Takarla	28	GHS Takarla
29	Nandpur	29	GHS Nandpur

2. Gagret Block

Sr.No. 1	Name of G.P./N.P. 2	Sr.No. 3	Name of Building 4
1	Ambota	1	GSSS Ambota
2	Badhera Rajputan	2	GSSS Badhera Rajputan
3	Bhaderkali Chalet	3	GSSS Bhaderkali Chalet
4	Daulatpur (U)	4	GSSS Daulatpur (U)
5	Gondpur Banehra	5	GSSS Gondpur Banehra
6	Ghnari	6	GSSS Ghnari
7	Joh	7	GSSS Joh
8	Kaloh(U)	8	GSSS Kaloh(U)
9	Kuthera Jaswalan	9	GSSS Kuthera Jaswalan
10	Kuthera Jaswala	10	GSSS Kuthera Jaswala
11	Marwari	11	GSSS Marwari
12	Mawa Kaholan	12	GSSS Mawa Kaholan
13	Nangal Jarialan	13	GSSS Nangal Jarialan
14	Oel	14	GSSS Oel
15	Pirthipur	15	GSSS Pirthipur
16	Dangoh	16	GHS Dangoh
17	Deoli	17	GHS Deoli
18	Gagret (U)	18	GHS Gagret (U)
19	Guglehar	19	GHS Guglehar

20	Jadla	20	GHS Jadla
21	Kadh	21	GHS Kadh
22	Kuneran	22	GHS Kuneran
23	Mawa Sindhian	23	GHS Mawa Sindhian
24	Saghnai	24	GHS Saghnai
25	Saloh Beri	25	GHS Saghnai

3 Bangana Block

Sr.No	Name of G.P./NP.	Sr.No.	Name of Building
1	Ambehra	1	GSSS Ambehra
2	Arloo	2	GSSS Arloo
3	Bangana	3	GSSS Bangana
4	Baul	4	GSSS Baul
5	Chaukimaniar	5	GSSS Chaukimaniar
6	Dhundla	6	GSSS Dhundla
7	Hatli	7	GSSS Hatli
8	Lathiani (Voc)	8	GSSS Lathiani (Voc)
9	Mandli	9	GSSS Mandli
10	Piploo	10	GSSS Piploo
11	Raipur Maidan	11	GSSS Raipur Maidan
12	Saroh	12	GSSS Saroh
13	Takoli	13	GSSS Takoli
14	Talmehra	14	GSSS Talmehra
15	Thanakalan	15	GSSS Thanakalan
16	Talai	16	GSSS Talai
17	Bhiambi	17	GHS Bhiambi
18	Budhan	18	GHS Budhan
19	Budhwar	19	GHS Budhwar
20	Charas	20	GHS Charas
21	Churdi	21	GHS Churdi
22	Dhanet	22	GHS Dhanet
23	Jutedi	23	GHS Jutedi
24	Paroian	24	GHS Paroian
25	Sahnal	25	GHS Sahnal
26	Kiarian	26	GHS Kiarian
27	Tanoh	27	GHS Tanoh

4 Haroli Block

Sr.No	Name of G.P./NP.	Sr.No.	Name of Building
1	Badhera	1	GSSS Badhera
2	Baliwal	2	GSSS Baliwal
3	Bathri	3	GSSS Bathri
4	Bathu	4	GSSS Bathu
5	Beetan	5	GSSS Beetan
6	Bhadsali	6	GSSS Bhadsali
7	Dulehar	7	GSSS Dulehar
8	Gondpur Bulla	8	GSSS Gondpur Bulla
9	Gondpur Jai Chand	9	GSSS Gondpur Jai Chand
10	Haroli	10	GSSS Haroli
11	Heeran	11	GSSS Heeran

12	Ispur	12	GSSS Ispur
13	Kangar	13	GSSS Kangar
14	Khad	14	GSSS Khad
15	Kungrat	15	GSSS Kungrat
16	Lalhri	16	GSSS Lalhri
17	Nangal Khurd	17	GSSS Nangal Khurd
18	Palkwah	18	GSSS Palkwah
19	Pandogha	19	GSSS Pandogha
20	Panjawar	20	GSSS Panjawar
21	Pubowal	21	GSSS Pubowal
22	Rora	22	GSSS Rora
23	Saloh	23	GSSS Saloh
24	Singan	24	GSSS Singan
25	Butt Kalan	25	GHS Butt Kalan
26	Chhetran	26	GHS Chhetran
27	Dhakki	27	GHS Dhakki
28	Kuthar Beet	28	GHS Kuthar Beet
29	Nangal Kalan	29	GHS Nangal Kalan
30	Polian Beet	30	GHS Polian Beet

4 Una Block

Sr.No.	Name of GP/NP	Sr.No.	Name of Building
1	Badoli	1	GSSS Badoli
2	Basal	2	GSSS Basal
3	Basdehra (voc)	3	GSSS Basdehra (voc)
4	Basoli	4	GSSS Basoli
5	Behdala	5	GSSS Behdala
6	Charatgarh	6	GSSS Charatgarh
7	Chattara	7	GSSS Chattara
8	Dehlan	8	GSSS Dehlan
9	Dhamandri	9	GSSS Dhamandri
10	Jakhera	10	GSSS Jakhera
11	Kuriala	11	GSSS Kuriala
12	Kuthar Kalan	12	GSSS Kuthar Kalan

21	Ajouli	21	GHS Ajouli
22	Badehar	22	GHS Badehar
23	Bharolian Kalan	23	GHS Bharolian Kalan
24	Chalola	24	GHS Chalola
25	Fatehwal	25	GHS Fatehwal
26	Jankaur	26	GHS Jankaur
27	Kotla Kalan	27	GHS Kotla Kalan
28	Panoh	28	GHS Panoh
29	Rainsari	29	GHS Rainsari
30	Raipur Sahoran	30	GHS Raipur Sahoran
31	Teuri	31	GHS Teuri

32	Basal Lower	32	GHS Basal Lower
33	Lamlehri	33	GHS Lamlehri

ANNEXURE 5

Resource Inventory & Capacity Analysis Equipment available In the District.

1. DETAILS OF EQUIPMENT AVAILABLE WITH HHG

1. Bolt cutters (Shears)-1
2. Circular Saw with Diamond Blade (Electric)-1
3. Sledge Hammer -1
4. Heavy Axe -1
5. Gloves Rubber, tested upto 25,000 volt-1
6. Stretcher harness (Set) -4
7. Blankets -270
8. Search Lights -2
9. Life Jackets -5
10. Suit-fire entry -1
11. Breathing Apparatus-Compressor-1
12. Pump-High pressure, portable-3
13. Extention ladder-4
14. C'o2Type-24
15. Fire Tender -4
16. Stretcher normal -1
17. Tent 80 Kgs -7
18. Tarpaulin -3
19. 3 wheeler Drive Vehicle/Truck-1

4. DETAIL OF MACHINERY AVAILABLE WITH HRTC

Sr. No.	Vehicle Number	Make & Model	Seating Capacity	Sr. No.	Vehicle Number	Make & Model	Seating Capacity
1	HP20A-9004	AL-2001	47	44	HP72-0695	AL-2007	47
2	HP20C-6001	AL-2003	47	45	HP72-0719	AL-2007	47

It is important to note that recovery vehicle is not available with HRTC in the district Una but it is available in Hamirpur

and RM HRTC would arrange it for disaster management in Una if required. However private people do have recovery vehicles in Una District that can also be arranged by RM HRTC if required. HRTC has one very well equipped workshop at District HQ itself.
